WORK EXPERIENCE

Salesforce Developer (Associate) Cognizant Technology Solutions

03/2021 - Present

Pune, MH, India

Information technology company

Achievements/Tasks

- Designed and implemented customized Salesforce solutions, including Apex triggers, classes, Lightning Web Components.
- Gather and analyze business requirements for Salesforce solutions.
- Developed and maintained Salesforce automation processes using flows and workflow.

PROJECTS

NextGen Platform & LNS System (Healthcare Industry) (03/2021 - Present)

- A Salesforce application for efficient donor record management and automated test reporting, improving healthcare data processes.
- Developed user-friendly interfaces for lab staff to create and update donor profiles, ensuring accuracy and accessibility.
- Developed personalized reporting features to generate detailed reports on donor histories, test outcomes, and trends for effective data analysis.
- The Lookback Notification System Project is designed to facilitate a fully automated and streamlined lookback process for a pharmaceutical company's BioLife business.
- Primary objective: Enhance compliance management to address increased risks.
- Focus on creating an easily scalable system for managing a growing network of donor centers. Emphasis on automation and integration for a future-proof solution in lookback notification processes.
