NAVITA PANCHAL

Salesforce Apex & LWC Developer

PERSONAL PROFILE

- Versatile Salesforce Developer, specializing in apex trigger and lightning web component, and more within the IT industry.
- Currently excelling as a Salesforce Developer Intern at ERP Force India, honing my skills in Salesforce CRM and gaining hands-on experience in various aspects of the platform.
- Proficient in Salesforce technologies such as Lookup and MasterDetail Relationship, Custom Object, Profile, Permission Set, Validation Rule, Data Security Model, OOPS Concept, Data Loader, Flows, Process Builder, Field History Tracking, and Report and Dashboard creation.
- Successfully completed a 6-month training program in Salesforce CRM from DurgaSoftwareSolutions, Hyderabad, enhancing my expertise in Apex Trigger, VisualForce, Controller, Batch Apex, Scheduled Apex, Future Method, Queue-able Apex,.
- Skilled in developing LWC Component, SOQL, DML Operation and integrating JavaScript and MS Excel for efficient data management.
- A deep understanding of SFDC including its Architecture.
- Knowledgeable in data security models, object-oriented programming concepts, and implementing business logic using controllers and collections.
- Recognized for developing a Rental Management Application using Apex and VisualForce, streamlining the process of managing rental properties and tenant payments.
- Proven capability in developing a Recruitment Management Application, leveraging Salesforce to optimize the recruitment process for organizations.

Experience

Salesforce Developer | ERP Force India | Jul'22-Present

Responsibilities:

- Developing and customizing Salesforce applications to meet business requirements.
- Collaborating with cross-functional teams to design, develop, and implement Salesforce solutions.
- Conducting testing and debugging of applications to ensure optimal performance.
- Assisting in the creation of Synchronous and ASynchronous Apex to enhance user experience
- Implementing data security measures and maintained the integrity of Salesforce databases.
- Participating in the development of Lightning Web Components involves various responsibilities aimed at creating efficient, responsive and user friendly web application on the SFDC platform.

PROJECTS

Rental Management Application: In contemporary times, residential and commercial complexes serve as spaces utilized for both office and residential purposes, with many units available for rent. Some flats within these complexes are already occupied by tenants, while others are ready for new occupants. Prior to occupancy, tenants typically enter into rental agreements, after which they are required to provide a security deposit. Once a tenant moves in, the owner is answerable for providing a monthly statement detailing rent, maintenance fees, and other charges. Tenants then make payments through various methods, including cash, cheque, credit card, or online transactions.

Technology Used - Apex VisualForce

Created a comprehensive SaaS-based application offering test-time payment, management, and analytics.

CERTIFICATIONS

 Salesforce CRM Certification from DurgaSoftwareSolutions, Hyderabad

PERSONAL DETAILS

Date of Birth: 6th November 1994

Languages Known: Hindi, English, Punjabi

Address: Noida, U.P

The application provides renters with detailed information about the property.

Recruitment Management Application: Hosted on Salesforce's cloud platform, the Recruitment Management Application is designed to streamline recruitment processes for organizations. Utilizing both declarative and custom development approaches, this application allows organizations to effectively manage positions, candidate profiles, skill sets, job applications, candidate reviews, and job postings across various employment websites. The project's aim is to enhance recruitment efficiency, reduce manual workloads, and improve the overall recruitment experience.
