PROJECTS -

PROJECT 1: CANTEEN MANAGEMENT SYSTEM

PROJECT OVERVIEW: This Management system works to automate the existing manual system with the help of advanced computerized software. The project is about taking orders of food from customers with their verification details and then admin processing it for food delivery to customers. The main objective of the project is to reduce administrative work, save time, provide fast and efficient service, and increase customer satisfaction.

ROLES AND RESPONSIBILITIES:

- Involved in the study/analysis of business functional specifications document.
- Involved in the setup of the application, standard and custom objects.
- Creation of workflows to automate the process for different requirements of the project.
- Created triggers based on certain conditions, to modify related Data & perform certain operations.
- Also work on the relationship of objects.
- Use workflow and process builder for sending email notifications.

PROJECT 2: Child & Adult FOOD DAY CARE Program.

PROJECT OVERVIEW: This project is based on the food daycare service for children and adults. We built a cloud-based child and adult care management includes tools to manage daycare reimbursement. Basically, we act as a mediator (Agency) between Day Care and the Government, so we are handling the data of daycare products, food services, number of users, and their food program based on years and months. We process the data and send it to the government for reimbursement. We will get reimbursement according to government terms and policy.

ROLES AND RESPONSIBILITIES:

- Involved in the study/analysis of business functional specifications document.
- Involved in the setup of the application, standard and custom objects.
- Involved in the data migration by using data migration tools.
- Creation of Automation to automate the process for different requirements of the project.

- Created triggers based on certain conditions, to modify related Data & perform certain operations.
- Also work on the relationship of objects.
