

PROFESSIONAL SUMMARY

- ▶ A highly technical, 2x certified Salesforce Dev/Admin with 2.2 years experience configuring Salesforce Sales, Service, and Marketing Cloud. Proven ability to analyze, design, and optimize business processes with hands-on experience implementing change, increasing user adoption, and driving best practices.
- ▶ Designed and developed various Apex Classes, Controller Classes, Extensions, and Apex Triggers for functional needs in various applications.
- ▶ Good hands-on practice with the new Lightning System Design, which helps quickly and easily create modern enterprise apps using Lightning App Builder and Lightning Components Performed.
- ▶ Hands-on experience with external systems by developing custom Apex RESTful classes for inbound classes, and Apex callouts for invoking outbound applications.

CERTIFICATIONS

- ▶ Salesforce Certified Administrator
- ▶ Salesforce Platform Developer 1

SKILLS

- ▶ Salesforce Administration: Sales Cloud, Service Cloud, Marketing Cloud
- ▶ Third-party Apps: DocuSign, Data Loader, Workbench, Postman
- ▶ Business Analysis
- ▶ Force.com, sales cloud, service cloud
- ▶ Salesforce.com Development
- ▶ Agile Methodology
- ▶ Jira: Proficient in using Jira for project management, issue tracking, and collaboration.
- ▶ Git: Experienced with Git version control for code management, branching, and collaboration.

EXPERIENCE

AXP Technologies, G7 Engineer

August 2023 - Present

Projects

Earlens(October 2023): Earlens is a privately held medical technology company committed to transforming the hearing experience for millions of people who suffer from hearing loss. The company has developed the Earlens Contact Hearing Solution. This revolutionary, nonsurgical hearing solution delivers the broadest bandwidth available today and superior sound quality.
Streamlined Payment Request Automation at Earlens using Salesforce.

- ▶ Worked with the user group for requirement gathering throughout the planning and implementation.
- ▶ Worked on specific requirements, gathered feedback, and ensured the solution addressed their needs effectively.
- ▶ Worked extensively in developing, and customizing pages with Lightning components, Custom, and developed dynamic components.
- ▶ Hands-on experience in Salesforce Lightning and Communities.
- ▶ Developed custom batch classes in Salesforce to efficiently process large volumes of payment requests.
- ▶ Designed and implemented a workflow within Salesforce to automate the approval process for checks. Thus ensuring proper authorization before vouchers were automatically transmitted to QAD for final processing.
- ▶ Worked with Apex Scheduler to invoke Apex classes at regular intervals.
- ▶ Used Batch Apex to build an archiving solution that ran on a nightly basis, looking for records past a certain date and adding them to the archive.
- ▶ To handle potential exceptions and ensure data integrity, designed workflows and triggers within Salesforce. These automated processes addressed specific scenarios and guided the system's actions accordingly.
- ▶ Conducted unit testing for each Scenario to validate code functionality and verify the creation of accurate check requests.
- ▶ Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.

Project: Techstack/AristaGroup – Benchmark to Salesforce Migration(August 2023)

Benchmark to Salesforce Migration – is a project in which I successfully replicated the existing functionalities of BenchmarkCRM in Salesforce Starter Edition. This involved a comprehensive understanding of both systems and a strategic approach to ensure seamless functionality replication

- ▶ Integrated Salesforce with Apollo enables access and keeps data synchronized within both platforms.
- ▶ Worked with the user group for requirement gathering throughout the planning and implementation.
- ▶ Resolve the Cases and support the team on urgent bases, implementing and working with real-time troubleshooting
- ▶ Attending daily AGILE SCRUM meetings and updating the status on a day-to-day basis with what is done and what has to be done.
- ▶ Designed, Implemented, and deployed Custom objects, Page layouts, Custom tabs, and Components to suit the needs of the application.
- ▶ Improved user adoption of a program of platform enhancements, including branding, custom apps, and standardized reports and dashboards.
- ▶ Involved in page layout customization for standard objects like Account, Contact, and Leads.
- ▶ Provided ongoing Salesforce.com maintenance and administration services including periodic cleansing, custom objects, and workflows.
- ▶ Implemented Security access to user profiles by creating Object-level, field-level, and record-level security.
- ▶ Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com Objects. Used it to read, extract, and load data from comma-separated values (CSV) files.

Accenture Pvt. Ltd., Application Development Analyst

November 2021 - February 2023

Project

OneView: Tax Invoicing Project: This is a project focused on generating tax invoices tailored to the specific tax laws and regulations of each country/state for products purchased by customers

Junior Salesforce Administrator, acting as the primary point of contact for 100+ Sales and Service Cloud users.

- ▶ Managing support tickets using Cases, and improved case resolution time by 10%.
- ▶ Developed reports, dashboards, and processes to continuously monitor data quality and integrity, reducing duplicate accounts by 20%.
- ▶ Implemented Marketing Cloud, automating repetitive tasks and increasing automation, saving each marketing user at least 1 hour of manual data entry per day.
- ▶ Involved in Assignments Rules, Escalation Rules, and Auto-Response Rules Configuration and Customization in Case Management.
- ▶ Implemented Email-to-Case, Web-to-Case entry, and manual case entry for entering customer's cases in the Cases Tab.
- ▶ Requirement Gathering: Collaborated with user groups throughout the planning and implementation phases.
- ▶ AGILE SCRUM Meetings: Attended daily AGILE SCRUM meetings, providing updates on completed tasks and upcoming work.
- ▶ Custom Labels for Tax Invoicing: Leveraged custom labels to enable tax invoicing for each country, offering a more efficient solution than hard coding. Stored country codes in custom labels for countries requiring tax invoicing.
- ▶ Custom Metadata for Regex Expressions: Utilized custom metadata to store regex expressions for each country. Ensured that customer data matched these expressions and bypassed tax calculations.
- ▶ REST API Integration: Developed a REST API class to facilitate data exchange between Salesforce and the Vertex system. Enabled seamless transfer of data and receipt of estimated tax information.
- ▶ Rigorous Testing and Debugging: Conducted thorough testing, and monitoring debug logs to ensure successful interaction with external systems. Verified status codes and estimated tax information accuracy.
- ▶ Version Control and Deployment: Transitioned updates from the Development environment to QA and UAT within project timelines.
- ▶ Utilized Git in Visual Studio Code for version control.
- ▶ Deployed changes using change sets.
- ▶ Testing and Production Deployment: We utilized the sandbox environment for testing before deploying changes to production.
- ▶ Workflow Rules and Business Logic: Created workflow rules, defining related tasks, time-triggered actions, email alerts, and field updates.
