-

Projects

1. Rubrik: (Oct 2022 - Jan 2024)

Client Profile: Cloud-based data security and backup solutions provider focused on protecting enterprise data from cyber threats like ransomware, supporting hybrid cloud environments through on-premises and cloud-based systems.

Environment: Salesforce Lightning/Classic, and Salesforce CPQ.

Responsibilities:

- Designed and developed custom solutions using Apex, Lightning Web Components (LWC), Triggers, and Flows to meet client-specific business needs.
- Customized Salesforce standard and custom objects, validation rules, workflows, and approval processes to support business logic.
- Managed Salesforce configuration tasks such as user roles, profiles, permission sets, page layouts, and validation rules.
- Fixed production issues, performed root cause analysis, and deployed timely bug fixes.
- Handled data management tasks like data imports, exports, deduplication, and maintaining data quality using Data Loader and SOQL.
- Used Git and CircleCI for version control and automated deployments.
- Created and maintained clear technical documentation and process guides.
- Worked closely with admins, business analysts, and QA teams to translate requirements into scalable solutions.
- Participated in code reviews, agile ceremonies, and sprint planning to ensure high-quality delivery.

2. Kyra Solutions : (Feb 2024 - Oct 2024)

Client Profile: Leading IT services provider specializing in delivering technology solutions to government agencies, with a strong track record in software development, project management, and award-winning project execution

Environment: Salesforce Lightning/Classic.

Responsibilities

- Analyzed and understood the data model and functionality of existing Salesforce Lightning systems.
- Participated in client meetings to gather requirements and align Salesforce solutions with business needs.
- Enhanced existing functionalities by developing custom solutions using Apex, Lightning Web Components (LWC), Flows, OmniScripts, and other Salesforce tools.
- Managed deployment processes using Change Sets, ensuring seamless integration across various environments.
- Developed and maintained robust test classes in Apex to ensure code quality, reliability, and functionality.
- Created and updated technical documentation for ongoing maintenance and knowledge transfer
- Supported data migration and data integration tasks, ensuring smooth transitions and data accuracy.
- Conducted end-to-end testing and User Acceptance Testing (UAT) to validate new features and changes.

3. Sunnova Energy (Nov 2024 - Present)

Client Profile: Sunnova Energy uses Salesforce to manage customer relationships, streamline service operations, and support sales and field teams in delivering clean, reliable energy solutions to homes and businesses.

Environment: Salesforce Lightning/Classic.

Responsibilities

- Picked up and worked on existing JIRA tickets for bug fixes, enhancements, and feature implementations.
- Participated in client meetings to gather requirements and align Salesforce solutions with business needs
- Enhanced and maintained Salesforce functionality using Apex, Lightning Web Components (LWC), Flows, and Validation Rules.
- Created and maintained clear, detailed technical documentation for all changes and features.
- Performed data loads and updates using Data Loader and Data Import Wizard while ensuring data accuracy and integrity.

Education

- Bachelor of Technology in Computer Science completed in 2022 from College of Technology and Engineering, Udaipur
- Completed 12th (Senior Secondary) in 2017 from M.V.P. Sr. Sec. School, Jaipur
- Completed 10th (Secondary) in 2015 from M.V.P. Sr. Sec. School, Jaipur

Personal Details

- DOB: 5 June 1999
- Nationality: Indian
- Languages Known: English & Hindi
