## PROJECT SUMMARY

---

### **Title : XPO Logistics**

**Role:** Developer/Administrator

#### **Project Overview:**

The primary objective of this project is to integrate and optimize extensive transportation and logistics operations, including the management of acquisitions within the Salesforce platform. This integration aims to enhance operational efficiency, improve customer relationship management, and provide robust analytics and reporting capabilities across all facets of the business.

#### **Responsibilities:**

- Study the requirements, design documents and understand them. Involved in requirement gathering from users.
- Debug Apex scripts using Debug Logs and System Log Console to catch Exceptions and execute Governors and Limits.
- Developed different Lightning Web Components and worked on Integration part also.
- Various data-related DML operations like data inserting, updating, deleting, and exporting using a data loader.
- Implemented Security access to the user profiles by creating Object-level security, field-level security, and record-level security.
- Develop Batch apex, Triggers, Visualforce, Reports, and Dashboards.
- Responsible for customizing Objects, Page Layouts, Record Types, Email Templates, Validation Rules, Report Types,
- Involved in writing Test Scripts.

### **Title : Altice Management**

**Role:** Developer/Administrator

#### **Project Overview:**

- The primary goal of this project is to implement Salesforce to unify customer interactions, service management, and marketing operations across its cable television and telecommunications services. This initiative will aim to improve customer satisfaction, streamline service delivery, and boost operational efficiency across states serving business customers.

#### **Responsibilities:**

- Customize and personalize Salesforce.com based on requirements.
- Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects.
- Worked on various salesforce.com standard objects like Accounts, Leads, and Opportunities. Maintained and developed the Custom objects, Custom fields, Custom tabs, and Validation rules. Customized different page layouts and assigned them to different profile users.
- Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application. Worked on workflows for field updates based on time-dependent workflow.
- Involved in creating action components based on client requirements.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client's requirements. Involved in field and record-level Security.
- Have sent mail to particular users using Apex code. Import and Export the Bulk data through the Data Loader.
