PROJECTS

Salesforce CRM based Implementation for Pharma Based Client

- A comprehensive Salesforce CRM application designed to streamline activity tracking, target management, and sales performance evaluation for pharmaceutical sales representatives.
- Developed solutions for multiple business requirements by configuring custom objects, fields, page layouts, validation rules, reports and dashboards and automating business process using Flows and Process Builder.
- Collaborated with the Team to develop and configure highly effective Salesforce solutions, leveraging Apex Classes, Apex Triggers, and Test Classes, while maintaining overall code coverage > 75%.
- Actively participated in deploying changes from one Sandbox environment to another using Change Sets.

Japan-Based Pharmaceutical Client

- Worked for a Leading Pharmaceutical Client based in Japan as a dedicated Veeva Vault Administrator, implementing multiple Vault configurations and workflows to streamline regulatory activities.
- Performed detailed analysis of technical requirements and designed the solution by customizing various Vault objects, fields, security settings, lifecycles, workflows on Vault Platform.
- Worked on many declarative administration tasks including managing custom fields, shared fields, email notifications and loading and extraction of data using Vault Loader.
- Maintained the integrity of the Vault platform by vigilantly monitoring Support tickets and promptly addressing user issues, ensuring seamless functionality of the system.
