Salesforce Admin + Developer

Objective

Detailed-oriented individual seeking to help organization achieve its goals as a Salesforce Developer. I possess a strong foundation in Salesforce administration, Apex development, and SOQL querying, with hands-on experience in implementing and optimizing Salesforce solutions.

Career Summary

- Entry-level Salesforce developer with strong academic background in computer science
- Completed Salesforce training and obtained Salesforce certifications like Salesforce Certified Administrator or Salesforce Certified Platform App Builder.
- Proficient in Salesforce development basics including Apex, Visualforce, Lightning Components, and Salesforce data model.
- Hands-on experience with Salesforce Developer Console, Salesforce Data Loader, and other Salesforce tools.
- Ability to work in a team environment, collaborate with stakeholders, and learn new technologies quickly.
- Strong problem-solving skills, attention to detail, and commitment to delivering high-quality solutions.

Technical Skill Set

- Salesforce Ecosystems: Salesforce Administrator, Apex, SOQL, Visualforce, Developer Console .
- Cloud Technologies: GCP
- Language: Python, Basic Java, C.
- Database : MySQL.
- Operating Systems: Window 10.
- Tools: MS Office (Word, Excel, Power point, Outlook)

Educational Qualification

- 2024 Bachelor in Computer Science And Engineering from Dr.Babasaheb Ambedkar Technological University Lonere, Raigad with 60%

Work Experience

Pmatiq Solutions , Chh.Sambhajinagar

Project #1 -

Project Name: Resource Management App

Role: Salesforce Intern

The purpose of my Resource Management App project was to streamline and optimize resource allocation and tracking within the organization. I designed and implemented custom Salesforce objects and fields tailored to our specific resource management needs, incorporating validation rules to ensure data accuracy and integrity. This project not only demonstrated my proficiency in Salesforce administration but also showcased my ability to translate business requirements into functional and efficient solutions.

Roles and Responsibilities:

- Create the Objects in that org (Project,Resource,V2MOM etc).
- Create the fields into that object and give the particular Data types .
- Comes up with missing Scenarios and get them clarified with Project Manager.
- Managing Different tools (Powerpoint,Microsoft word etc)

Functional Skill Set

- Ability to handle a team of three resources while working on multiple requests simultaneously.
- One of the major responsibilities included training the new members in the team and getting them productive quickly.

Project #2 -

Project Name: Sanjay Gupta Tech School

In this Sanjay Gupta Tech School, I led a comprehensive project focused on modernizing the school's operational framework through Salesforce. One of the key aspects of this project was the creation of various custom objects, including class management, teacher profiles, skill sets, and student performance metrics. These custom objects were meticulously designed to facilitate efficient classroom organization, teacher-student allocation based on skill sets, and comprehensive performance tracking

Roles and Responsibilities:

- Create the Objects in that org (Student,Instructors,Classes etc).
- Create the fields into that object and give the particular Data types .
- Managing Different tools (Powerpoint,Microsoft word etc)
- In a project guided by YouTube tutorials, I assumed responsibilities such as Salesforce customization, data management, testing, debugging, documentation.
- Continuous learning, showcasing my ability to implement and adapt technical skills effectively.
