ABOUT ME

Full Stack Developer specializing in Generative AI-driven web solutions that enhance automation and engagement. Experienced in React, FastAPI, Node.js, and MongoDB, with hands-on expertise integrating LLMs and Gemini APIs into scalable applications achieving up to 30% faster workflows and 20% higher user retention. Passionate about bridging AI innovation with product engineering to deliver intelligent, future-ready systems..

PROJECTS

AI-Powered IT Support Management Dashboard

Developed an AI-driven IT support dashboard inspired by Jira, featuring automated ticket classification using LLMs for faster triage and prioritization.

Implemented multilingual support (10+ languages) and voice-to-text ticket creation, improving accessibility and reducing manual input time by 40

Optimized ticket resolution workflows, cutting response time by 35% and enhancing agent productivity by 25%.

Delivered a real-time, scalable full-stack architecture, integrating Gemini API for intelligent ticket insights and summarization.

Personalized Vacation Planner powered by AI

- Engineered an AI-driven vacation planner using Gemini API, generating 95% personalized itineraries based on user preferences and travel history.
- Integrated Geoapify + Geoapify APIs to enable real-time destination search and map-based navigation, improving user experience by 40
- Built a modern, responsive UI with React, Tailwind CSS, and ShadCN UI, achieving 99% Lighthouse accessibility and responsiveness score.
- Implemented Firebase Authentication and Firestore for secure user data storage, reducing login friction by 30% and ensuring 100% session reliability.

PrepMate – AI-Powered Interview Preparation Platform

- EPrepMate – AI-Powered Interview Preparation Platform
- Developed a full-stack AI interview assistant using React, Tailwind/Flowbite, Firebase, VAPI, and Gemini API, enabling real-time mock interviews with personalized AI feedback and topic-based question generation — boosting user engagement by 45
- Engineered background task automation to generate instant feedback summaries, cutting response time by 35% and improving overall user retention by 25%.
- Designed a highly responsive, accessible UI that achieved a 98% Lighthouse performance score and handled scalable user sessions via Firebase for seamless experience across devices.

EDUCATION

2021 – 2025 B.Tech (Computer Science and Engineering) at **Silicon Institute of Technology, Sambalpur, Odisha**

(CGPA: 7.66/10.0)

2020 – 2021 Senior Secondary Education at **DAV Centenary Public School, Ajmer**

(Marks: 84.6%)

2018 – 2019 Matriculation at **DAV Centenary Public School, Ajmer**

(Marks: 92.4%)

SKILLS

Programming Languages	Java, Python, JavaScript, TypeScript, SQL
Frontend Development	HTML, CSS, Tailwind CSS, React
Backend & Frameworks	FastAPI, Node.js
Databases	MongoDB, SQL
DevOps & Tools	Docker, Git, Firebase
