KEY SALESFORCE PROJECT

Deligence Technologies Pvt. Ltd.

Role: Sr. Salesforce Developer

TITLE : Auto Merge Duplicate Case

ENVIRONMENT : Lightning, Trigger, Apex, HTML and JavaScript.

PROJECT OVERVIEW:

An appexchange app that will help organizations to auto merge the duplicate cases that are received from same email address with same subject and description. The user will be able to compare the cases based on the matching percentage of description and can merge it on button click. Worked on triggers, Lightning Aura Components, test classes, managed package.

ROLES AND RESPONSIBILITIES:

- Developed Apex Classes, Controller Classes, and Apex Triggers to facilitate automatic case merging functionality.
- Created a Lightning Aura Component enabling users to compare cases based on matching percentages in descriptions and initiate merges.
- Designed and implemented a Lightning Web Component for Admin Setup.

TITLE : Assimilated communications

ENVIRONMENT : Lightning, Trigger, Apex, HTML and JavaScript.

TEAM SIZE : 03

PROJECT OVERVIEW:

The organization needed a Force.com cloud application which could handle the changes in data and the user will be able to avoid the unnecessary changes in data and to create cases from the record creation in custom objects. Worked on custom objects, flow builder, triggers, Lightning Aura Components.

ROLES AND RESPONSIBILITIES:

- Crafted Lightning components to facilitate data comparison and streamline user interactions.
- Architected Custom Objects and engineered Apex Classes, Controller Classes, and Apex Triggers to address diverse functional requirements.
- Designed and implemented a Lightning Aura Component enabling the transfer of selected records from standard objects to custom objects.
- Orchestrated flows to accommodate various business needs.
- Leveraged Batch Apex and schedulable batch Apex for optimized data processing.
- Utilized Force.com developer toolkit for custom business logic development and data imports via Apex Data Loader.
- Spearheaded deployment efforts for seamless application rollouts.

TITLE : Rapid Pitch

ENVIRONMENT : Lightning, Integration, Trigger, Apex, HTML and JavaScript.

PROJECT OVERVIEW:

The organization needed a Apexchange application which could handle the data received and sent to Salesforce from external and generate reports based on the data received from external server. Worked on custom objects, triggers, Lightning Aura Components, Lightning Web Component, Integration.

ROLES AND RESPONSIBILITIES:

- Contributed to the development of Salesforce solutions, including the creation of Lightning components for authorization processes and other project requirements.
- Assisted in analyzing both business and technical requirements.
- Designed Custom Objects and developed/deployed Apex Classes, Controller Classes, and Apex Triggers to meet project specifications.
- Integrated with external systems via REST API, designing web service classes and executing callouts to external server APIs.
