Project Profiles

Project Details

Title: Accor Hotel
Search Environment:
SFDC Team Size : 4
Role: Salesforce
Developer

Project Description

In this project, we utilized the Salesforce platform and developed custom applications using Lightning Web Components. These applications provide a centralized solution for all travel-related needs

Responsibilities

- Responsible for understanding user requirements, and designing and developing the application.
- Developing reports, dashboards, and processes to continuously monitor data quality and integrity.
- Proficiency in development, and implementation of web- based applications.
- Developed Lightning Web Components, Batch, Test, and Schedule classes.
- Performed Deployment and Data Migration using Change sets, and Data Loader.
- Helped the testing team understand the requirements and prepare test scripts for the user stories.
- Responsible for performing administrative and configuration functions in Salesforce.com CRM such as creating/modifying Objects, different types of fields, managing users, security settings, permission sets, etc.
- Implemented pick lists, dependent pick lists, lookups, master-detail relationships, validation, and formula fields to the custom objects.
- Worked as administrator granting and maintaining user roles, groups, permissions, and enabling various security controls.
- Reengineered APEX code already in production to optimize trigger-based transactions for performance and speed as well as work seamlessly with governor limits

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
