Pratiksha Mali

Salesforce Developer

Experience Summary:

- ☐ - 3 years of hands-on experience in developing and maintaining cloud applications on Salesforce.
- ☐ - Proficient in Salesforce technologies: APEX, Lightning framework, and Visualforce.
- ☐ - Expertise in declarative configuration: workflow, process builder, approval flows, formulas, validations, etc.
- ☐ - Strong knowledge of building Salesforce apps using Lightning, APEX, workflows, and batches.
- ☐ - Experience in designing and configuring access and data security using Salesforce features.
- ☐ - Skilled in creating technical design blueprints for Salesforce applications, considering functional, technical, non-functional, and integration needs.
- ☐ - Excellent team player with strong leadership and communication skills.
- ☐ - Expertise in web application development, JavaScript, CSS, HTML.
- ☐ - Strong programming, debugging, and problem-solving skills.

Projects:

1] CRM System for Real Estate Developer (Sep 20 - Dec 21)

- ☐ **1. Lead and Opportunity Management.**
- ☐ **2. Custom Objects Management (Projects, Buildings, Flats):**
 - ☐ - Designed and configured custom objects to represent real estate projects, buildings, and individual flats.
 - ☐ - Established relationships between objects for a structured representation of the real estate hierarchy.
 - ☐ - Created custom reports and dashboards for project progress, sales performance, and financial metrics.
- ☐ **Role:** Development.
- ☐ **Responsibilities:**
 - ☐ - Lightning web components development.
 - ☐ - Apex Triggers, Classes development.
 - ☐ - Implementation of Lightning flows, Approval Processes, Process Builder, Workflow tasks, and alerts.
 - ☐ - Testing, debugging, and deployment.

2] Nell Process Automation (Jan 22 - Feb 23)

1] Payroll Module:

- Designed and implemented Lightning Web Components (LWC) for efficient creation and editing of payroll records.
- Developed a custom LWC component for creating new payroll records and another for editing existing records, enhancing user experience and data accuracy.
- Implemented a salary slip generation feature using Visualforce (VF) pages and Apex classes.
- Integrated the generated salary slip with the corresponding records' notes and attachments.
- Automated the distribution of salary slips by sending them to employees via their company email IDs.

2] Inventory Management:

- Created a streamlined process for item inward and stock management within the Inventory Module.
- Implemented a flow to create records in the related list for item inward, optimizing the inventory management workflow.
- Designed and developed functionalities for generating invoices using Visualforce (VF) pages and Apex classes.

Role: Development.

Responsibilities:

- Lightning web components development
- Develop Apex Triggers, Classes.
- Implementation of Lightning flows, Approval Processes, Process Builder, Workflow tasks and alerts.

- Testing, debugging and deployment.

2] 3] Connecting Businesses (Mar 23 - Till Date)

1] Member Request and Member Details:

- Custom Salesforce Objects and Fields:

- Member Information: Custom objects and fields are implemented to capture detailed member information, including contact details, business affiliations, and preferences.
- User-Friendly Interface: Lightning components are developed to create an intuitive user interface for members, enhancing the experience of submitting and managing member requests.

- Automation with Salesforce Process Builder and Workflows:

- Approval Processes: Salesforce Process Builder and workflows are configured to automate the approval processes for member requests, ensuring a streamlined and efficient workflow.

2] 2] Membership Type and Membership Category:

- Engineered a flexible membership management system with custom objects for membership types and categories.
- Integrated with external systems to synchronize membership data and maintain data integrity.
- Implemented validation rules and data validation tools to ensure accurate membership categorization.

Role: Development.

Responsibilities:

- Lightning web components development
- Develop Apex Triggers, Classes.
- Implementation of Lightning flows, Approval Processes, Process Builder, Workflow tasks and alerts.
- Testing, debugging and deployment.

Certifications:

- ☐ 1] Salesforce Certified Platform Developer I (WI22).
- ☐ 2] Salesforce Associate Certified.

Super Badges:

- ☐ 1] Flow Administration Superbadge Unit.
- 2] Flow Elements and Resources Specialist Superbadge.
- 3] Flow Optimization Superbadge Unit.
- 4] Flow Fundamentals Superbadge Unit.
- 5] Process Automation Specialist.
- 6] App Customization Specialist.

Skills Summary:

- ☐ **Languages:** Java, Apex, LWC, SOQL, SOSL, JavaScript.
- ☐ **Technology:** Salesforce.
- ☐ **Database:** SQL.
- ☐ **Web Technology:** HTML, CSS, JavaScript.
- ☐ **Tools:** Visual Studio Code.

Professional Experience:

- ☐ - Bachelor of Engineering in Computer Science, 2020
- ☐ Navsahyadri Education Society's Group of Institutions, Pune (SPPU).
