

PRAVEEN DHAR DWIVEDI

Salesforce Developer | Apex & SOQL | Lightning Web Component
praveendwivedi1245@gmail.com | [Trailhead](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Salesforce Developer with hands on learning experience in Apex, LWC, and SOQL. Previously worked as a Data Analyst intern at Info Edge (Naukri.com), gaining strong analytical and problem solving skills.

EDUCATION

Bachleors of Science in Computer Science

Nov 2022 - Jun 2026

Deshbandhu College, University of Delhi (DU)

Class XII (PCM with Computer Science)

Apr 2021 - May 2022

Fatima Senior Secondary School, Gonda - Uttar Pradesh

EXPERIENCE

Data Analyst Intern

Jun 2025 – Sept 2025

Naukri.com - Info Edge (India) Ltd.

- Automated extraction and integration of job and internship listings from multiple career sites using Python, web scraping, and data pipelines, improving platform efficiency and data quality.
- Performed advanced data analysis and EDA, generating actionable insights to support business decisions and stakeholder reporting.
- Strengthened problem-solving and data-handling skills, providing a foundation for working with Salesforce datasets, automation, and reporting.

PROJECTS

Tours & Tourism App

- Developed a Salesforce CRM app with **5+ custom objects**, **20+ fields**, and Lightning Web Components (LWC) to manage tour packages, customer bookings, payments, and journey details.
- Automated booking workflows using **Salesforce Flow**, **Apex triggers**, and **Validation Rules**, improving accuracy by 80%.
- Created **8+ reports and 3 dashboards** with **SOQL** queries for insights, and integrated data via **Data Loader & Workbench** for efficient business tracking.

Employee Service & Asset Management App

- Designed an application in Salesforce to handle employee service requests and asset tracking (laptops, IDs, etc.) with **custom objects**, **Visualforce pages**, and **Lightning Web Components**.
- Streamlined request assignment and approvals using **Flows**, **Apex logic**, and automated notifications, which reduced manual follow-ups and improved resolution speed.
- Delivered actionable insights by configuring custom reports and dashboards, while leveraging **SOQL queries**, VS Code, and **Git/GitHub** for backend operations and version control.

TECHNICAL SKILLS

- Salesforce Technologies: Apex, Visualforce, Lightning Web Components, SOQL, Salesforce Flow
- Tools: Salesforce Developer Console, Data Loader, Workbench, Advance Excel
- Languages: Java, Python, SQL, HTML, CSS, JavaScript
- Tools & Platforms: MySQL, Git/Github, Docker, Visual Studio Code, Postman, IntelliJ Idea
- Core Concepts: Data Structures and Algorithms, OOPs, DBMS

ACHIEVEMENTS

- Completed 35+ Salesforce Trailhead modules and Superbadges, building a strong foundation in Apex, SOQL, and Flows.
- Designed and deployed 2 Salesforce applications in Developer Playground, showcasing ability to translate business needs into functional CRM solutions.
