

PUNEET REDHU

SALESFORCE DEVELOPER

PROFILE

A versatile, hardworking individual, driven to meet or exceed a company's expectations to deliver high-quality software products. Experienced in Salesforce. An effective listener that can communicate technical information in an easily understandable way. am flexible and open to learn new technologies while working keenly improving my innate programming skills. I am most efficient when encouraged and would like to utilize my skills and knowledge in solving problem s efficiently.

WORK EXPERIENCE

Tavant Technologies

Salesforce Developer

Project - Movement Mortgage

04/2023 - 06/2024

- The project aimed at building a software over Salesforce using it as a platform to cater to the use case of mortgage lending system that is being used widely all over the USA. It involved handling lending of loans to customers through Loan Officers.
- My role : To develop effective and efficient solutions for the business requirements using concepts like Apex Triggers, Apex Programming (Concepts like Batch Classes, Test Classes, Best practices for Apex programming), Flows, Security Design, Setup, Configuration and Customization of Apps, Push Notifications, Email Alerts, Process Automation, Community Building.
- Understanding the requirements and following industry standards to maintain the quality of code and also adhere by the optimized technical architecture suggested built by the Technical Architects and to build more Functionality over that.
- Providing better solutions where I feel improvements could be done while understanding the use case quite well, understanding the concepts like Asynchronous calls and their needs so the code base can stay optimized and perform as good as expected and even better.

Tavant Technologies

Software Engineer Trainee

Project - Customer Success (Carrier Transicold)

02/2022 - 04/2023

- Carrier Transicold aimed at managing the parts and claims settlements for the devices they used in transport vehicles. It was using an existing package (product) build by Tavant Technologies called TWOD (Tavant Warranty On Demand) that handled the major common aspects of concepts related to claim settlements and part returns.
- My Role : Customer Success was the team that handled after delivery services and support where the team had to handle Change Requests, Updates, Bug Fixes. Being a part of the team my part was to handle the bug fixes in the production environment or lower ones using concepts like Apex programming and Salesforce Administration, Customization and Configuration.
- Managing time and providing up to date solutions for Critical Bugs in production environment so that the customer doesn't have to wait in order to get the business back on track.
