EXPERIENCE

RSM US | SALESFORCE CONSULTANT

Feb 2022 – Present | Kolkata, INDIA

SENIOR ASSOCIATE | AUGUST 2023 – PRESENT

- Led the development of a Microsoft Dynamics 365 **PRM replacement project**, migrating to Salesforce and providing support for data integrations using MuleSoft.
- Performed extensive **code reviews and optimizations** on numerous Apex codebases, significantly enhancing system performance, scalability, and maintainability.
- Developed an intuitive **Lightning Web Component** for bulk record insertion, enhancing user experience. It **streamlined the process** by enabling parent record selection, large CSV uploads, multi-layer validations, error handling, and efficient record insertion, while maintaining a detailed log of results.
- Authored **best practices** documentation on **Asynchronous Apex** and **Flows**, providing developers with strategic guidance for writing efficient, scalable code.
- Engineered a **custom pricing engine** to calculate margins and discounts at multiple levels, effectively replicating CPQ functionalities and reducing licensing costs.

ASSOCIATE | FEBRUARY 2022 – JULY 2023

- Spearheaded the **Sales Cloud implementation**, configuring robust sales processes, lead management systems, opportunity forecasting, and custom single sign-on (SSO) solutions.
- Enhanced **TestFactory** and implemented automation to populate required fields in Apex Test Classes, significantly streamlining the unit testing process.
- Developed a **Metadata Components Tracker** using LWC to query metadata items, allow selection, and link to development tickets in the project management system, enhancing development tracking in Salesforce.
- Improved and utilized an open-source **Error Logging Framework**, enabling efficient tracking and resolution of unhandled exceptions across multiple projects.

PROJECTS

CODE HELPER | VSCODE EXTENSION, JAVASCRIPT, TYPESCRIPT

- Developed a VSCode extension providing quick **Apex and LWC snippets**, boilerplate **templates** for async classes, and **documentation helper** for classes and methods, significantly improving developer productivity and code consistency.

SALESFORCE ORG SCANNER | NODE.JS, POSTGRESQL, REDIS

- Contributed to enhancements and issue resolution in a comprehensive Salesforce **environment scanning application** built on Node.js, ensuring improved functionality, reliability, and efficient report generation.

SEAT BOOKING WEB APP | EXPERIENCE SITE, LIGHTNING WEB COMPONENT

- Designed and developed a Seat Booking Web Application using Experience Site and LWC, enabling location verification and seamless **check-in and check-out of seats** via QR code scanning.

SKILLS

PROGRAMMING

- Apex • SOQL/SOSL • Java
- JavaScript • HTML • CSS
- TypeScript • Python

LIBRARIES/Frameworks

- LWC • Flows • Visualforce
- Conga • Slack Integration
- Custom-SSO • Approvals
- Node.js • React.js • RDBMS
- PostgreSQL • Mobile App
- Redis

TOOLS/PLATFORMS

- Copado • MuleSoft
- GitHub • Heroku • JIRA
- VScode • Lucid • Excel

EDUCATION

TECHNO MAIN SALT LAKE

BACHELOR'S IN COMPUTER SCIENCE

2017 - 2021 | Kolkata, India

GPA: 8.11
