PROJECT PROFILE

Intelligent Automation Solutions (CPQ) Salesforce Developer

In this project , we utilized the Salesforce CPQ to streamline sales operations, optimizing quoting, pricing, and billing for faster sales cycles. Our approach enhances efficiency, driving accelerated revenue growth

Responsibilities:

- Actively engaging in continuous learning and skill development to stay updated with the latest CPQ features, best practices, and industry trends.
- Assisting users with troubleshooting issues, providing support, and resolving any technical issues or system errors encountered within the CPQ environment.
- Engaging directly with customers to gather feedback, understand pain points, and gather insights for further enhancements and customization of the CPQ solution. Optimized Flows , Batch Apex and Triggers to meet the unique business requirements .
- Executing data migration processes using tools like Salesforce Inspector to ensure smooth transition and integrity of data within the CPQ system.
- Worked on Product Configuration , Pricing Structure and Pricing rules to meet the user requirements. Gained knowledge regarding Renewals and Amendments .

Looking For Booking Portal (Sales & Service Cloud) Salesforce Developer

In this project, we utilized the Salesforce platform and developed custom applications using Lightning Web Components. These applications provide a centralized solution for all travel-related needs.

Responsibilities:

- Responsible for understanding user requirements, designing and developing the application.
- Implemented LMS, LDS and lifecycle hooks for enhanced data communication and component interaction within the modules. .
- Proficiency in development, and implementation of web-based applications.
- Developed Lightning Web Components, Batch, Test and Schedule classes.
- Performed Deployment and Data Migration using Change sets, and Data Loader.
- Helped testing team to understand the requirement and prepare test scripts for the user stories.
- Responsible for performing administrative and configuration functions in Salesforce.com CRM such as create/modify Objects, different types of fields, manage users, security settings, permission sets etc.
- Worked with the designing team and implemented responsive and intuitive user interfaces using HTML, CSS, JavaScript, and LWC components
- Worked as administrator granting and maintaining user roles, groups, permissions and enabling various security controls.
- Reengineered APEX code already in production to optimize trigger-based transactions for performance and speed as well as to work seamlessly with governor limits.

Order Management (Sales & Service Cloud) Salesforce Developer

Our platform automates all online order activities and provides a streamlined solution for order management. Customers can easily track their orders, check the status, and connect with a support agent. The platform also provides real-time data and analytics for better decision-making and improved work coordination.

Responsibilities:

- Administrator of Salesforce.com CRM application responsible for configuring and maintaining user security settings as per organizational policies.
- Developed Apex Classes, Controller Classes and Apex Triggers for various functional needs in the application
- Migrated data from external sources and performed insert, delete, upsert, export operations on millions of records.
- Responsible for Configuring, Customizing and Maintaining Application.
- Designed interface using Visualforce page and their supportive Controller Classes
- Implemented pick lists, dependent pick lists, lookups, master detail relationships, validation and formula fields to the custom objects
- Worked as administrator granting and maintaining user roles, groups, permissions and enabling various security controls.
- Hands on experience on Customizing Reports and Dashboards for business use.
- Responsible for performing administrative and configuration functions in Salesforce.com CRM such as create/modify Objects, different types of fields, manage users, security settings, permission sets, etc.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
