PROFILE

Entry-level **Data Scientist** with hands-on experience in Python, SQL, Machine Learning, Deep Learning, NLP and Data Analysis. Skilled in EDA, feature engineering, predictive modeling, statistical analysis, and model evaluation techniques (accuracy, precision, recall, F1-score). Experienced in deploying ML models using Streamlit, building Power BI dashboards, and applying ANN and CNN to solve real-world business problems through data-driven insights.

EDUCATION

Biju pattnaik University of Technology

Odisha, India

Masters Of Computer Application (MCA)

CGPA :8.28 , 2023– 2025

Faki Mohan University

Odisha , India

Bachelor's Of Physics (BSc)

CGPA : 8.11 , 2020-23

SKILLS

Programming & Query Languages: Python, SQL

Statistics & Mathematics: Statistics, Probability, Hypothesis Testing, Descriptive Statistics, Inferential Statistics

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel (Pivot Tables, Charts)

Machine Learning: Supervised Learning, Classification Algorithms, Regression Algorithms, Linear Regression, Logistic Regression, Feature Engineering, Model Training, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), TensorFlow, Keras

NLP :Text Preprocessing, Stopword Removal,BoW, TF-IDF, Basic Text Classification, Sentiment Analysis , NLTK

Data Processing: Data Cleaning, Data Wrangling, ETL

Databases: MySQL, PostgreSQL

Tools & Deployment: Jupyter Notebook, Google Colab, VS Code, Streamlit, Flask, FastAPI, REST APIs

Version Control: Git, GitHub

PROJECTS

Image Classification (Deep Learning) [Link](#)

Tech Stack: Python, TensorFlow, Keras, Streamlit

- Built a CNN-based **multi-class image classification model** using deep learning.
- Applied image preprocessing and data augmentation techniques to reduce overfitting.
- Designed CNN architecture with convolution, pooling, and dropout layers for better performance.
- Developed **CNN-based classification algorithms** and deployed the model using Streamlit.

Credit Card Fraud Prediction (Machine Learning) [Link](#)

Tech Stack: Python, Scikit-learn

- Developed a fraud detection model using Logistic Regression for **predictive analytics**.
- Performed **statistical analysis**, data preprocessing, feature scaling, and handled imbalanced data.
- Implemented **classification algorithms** to identify fraudulent transactions.
- Achieved **93.91% accuracy** with strong precision, recall, and F1-score.
- Generated actionable **business insights** using confusion matrix and evaluation metrics.

HR Analytics Dashboard (Power BI) [Link](#)

Tech Stack: Power BI, Excel, SQL

- Created an interactive Power BI dashboard using 767 employee records.
 - Applied data modeling and statistical analysis to analyse employee attrition, salary, and tenure.
 - Delivered meaningful business insights to support data-driven HR decision-making.
-
