INTERESTS

Fitness • Self-improvement • Vlogging

PROJECTS

QKart Frontend

QKart is an e-commerce application offering a variety of products for customers to choose from.

During the course of this project :-

- Implemented the core logic for authentication, shopping cart and checkout
- Improved UI by adding responsive design elements for uniform experience across different devices
- Utilized REST APIs to dynamically load and render data served by the backend server

QTripDynamic

QTrip is a travel website aimed at travellers looking for a multitude of adventures in different cities.

During the course of this project,

- Created web pages using HTML and CSS and made them dynamic using JavaScript
- Improved UX with multi-select filters, image carousels
- Utilised localStorage to persist user preferences at client-side

XBoard

XBoard is a News Feed website that will feature the latest news for select topics, from Flipboard.

During the course of this project,

- Built XBoard using HTML, CSS, Bootstrap and JavaScript from scratch
- Used Accordions and Image Carousel to improve UI
- Fetched news content from flipboard's RSS feed using REST API

COURSES

2023 – 2024

Fellowship Full Stack, Crio.do
