Projects

Project 1: Health Interface

Used Tools : Manual and Automation Testing, JIRA and Selenium.

Description: The Health Interface Platform offers a complete solution to streamline patient data, encounter management, medical histories, lab results, remote monitoring and billing, enabling healthcare providers to digitize clinic and EMR solutions. With real-time access to medical records, physicians can easily update and communicate with other providers, ultimately improving patient outcomes while maintaining a secure environment.

1. Users are allowed to schedule consultation with a Doctor according to specialization.
2. Users can easily make payment for consultation and remote monitoring by tabby and TSYS.

Project 2: EWO

Used Tools : Manual and Automation Testing, JIRA and Selenium.

Description: EWO is a media site, designed to facilitate ad-based marketing in the wellness industry. It will provide a central hub to support a fragmented marketplace of wellness providers who wish to establish a market presence to augment an existing website EWO will support (via phased launches).

1. Organic & Inorganic content to provide users with access to educational, motivational content to help them with their wellness journeys. This can include:
 - a. Articles and images
 - b. User Generated Content: images, reports
 - c. Social content: likes, comments, shares, saves, etc.
2. Community discussions and forums (for users and providers)

Project 3: Title : Trip Mood Mobile App

Used Tools : Manual Testing, Active Collab(Bug Tracking)

Description: This project is all about a trip plan. Those who are planning for a trip can start a discussion with a group and they can create a group with trip people. People who already had a trip can share their experience with others. The user can start Trip chat, group chat and single chat

Project 4: Title : FM solutions

Used Tools : Manual Testing, Active Collab(Bug Tracking)

Description: FM solutions is a transport site, where users can transport loads to other locations. Shipper can directly assign the created load to carrier and spot market activity. Once the load not accepted or rejected by the carrier, the side load sent to spot market activity and fuel surcharge is applied according to distance.

Role and responsibilities

- Understanding FRD and translating requirements into test scenarios for both manual and automated testing.
- Conducting Knowledge Transfer (KT) sessions with the manual testing team to identify reusable modules and gathering manual test cases for automation.
- Developing automated test scripts using Selenium TestNG for regression testing and functional testing.
- Involved in KT sessions with the manual testing team for reusability modules and gathered manual test cases from them.
- Participating in test case review meetings with the test lead to discuss test strategy and refine testing processes.

Professional Certifications

Salesforce Administrator

 salesforce  2020  India

Educational Qualifications

B.Tech

 Rajasthan Technical University, KOTA  2013-2017  India

Skills

- Salesforce Mobile App testing
- Test Script Development and Execution in Selenium
- Automated Regression Testing with Selenium TestNG
- Test Automation Framework Design and Implementation
- API Testing using postman and check response for GraphQL query.
- Defect Tracking and Management in manual testing
- Test Planning and Strategy Development in manual testing
- Test Scenario and Test Case Design in manual testing
- Exploratory Testing Techniques
- Usability Testing for Web and Mobile Applications
- Integration Testing Strategies and Techniques
