## Profile

Experienced Salesforce developer with a track record of success in delivering impactful solutions across two applications and a project. Proficient in Lightning Web Components (LWC), Apex, triggers, batch classes, and adept at implementing security models. Skilled in Sales Cloud and Experience Cloud development, ensuring seamless user experiences and optimized business processes. Dedicated to continuous learning and staying updated with the latest Salesforce technologies to drive innovation and efficiency

## Experience (3.3 Years)

### **SALESFORCE DEVELOPER | NEILON TECHNOLOGIES LLP | APRIL 2023 – PRESENT**

Worked on

#### Neilon Job Management:

- It helps businesses onboard customers faster & more efficiently. Simplify project management by quickly creating projects. Define project services, roles and assign services to project team. Efficiently send invoices to customers for completed services
- Played a key role in the development of Salesforce solutions, including the creation of Lightning web components
- Designed Custom Objects and engineered Apex Classes, Controller Classes, and Apex Triggers, schedulable class
- Developed comprehensive test classes to validate the functionality and performance of Salesforce components
- Create Admin guide, User guide and Test cases of that component.

#### Neilon S3-Link:

- S3-Link helps customers by providing unlimited and secure file storage and distribution. It is an application to integrate Amazon S3 file storage with Salesforce
- Implement a batch class to facilitate the smooth transfer of files from Salesforce to Amazon S3, ensuring efficient and reliable file management.
- Create apex class responsible for moving deleted files to the S3-recycle bin, enhancing data retention and recovery capabilities. Additionally, implemented a batch class to automatically delete files from the S3-recycle bin after given days, optimizing storage utilization.
- Spearheaded the development of a custom folder structure within Amazon S3 to streamline file organization and retrieval, enhancing user experience and productivity
