- Apex
- Lightning web Components
- HTML
- JavaScript
- CSS

Languages

- English(Proficient)
- Hindi(Fluent)
- Marathi(Fluent)

Certification -Salesforce Developer Internship Certificate (AICTE #Smartinternz)

Project:

I successfully developed and automated a comprehensive *Project Resource Allocation App* on Salesforce, designed to optimize resource management within my organization. The project was executed in two phases: **App Development & Customization** and **Project App Automations**.

Phase 1: App Development & Customization

- Created a custom Salesforce app called "Resource Allocation" to manage project assignments efficiently.
- Customized objects such as *Project*, *Employee*, and *Project Assignment* with fields tailored to Agile and Waterfall methodologies.
- Designed page layouts, record types, and validation rules to enhance data integrity and user experience.
- Developed reports and dashboards to support data-driven decisions and visualize resource allocation.

Phase 2: Project App Automations

- Automated project assignment creation and status updates, reducing manual tasks and ensuring accuracy.
- Implemented dynamic date management, an approval process for project extensions, and role-specific field visibility using dynamic forms.
- Ensured data security through private Organization-Wide Defaults (OWD) for critical objects.

Key Outcomes

- Delivered a user-friendly, efficient app that streamlined project allocation processes.
- Implemented advanced automations that reduced manual work and maintained data consistency.
- Enhanced proficiency in Salesforce automation tools and security configurations.

This project significantly improved resource management capabilities while enhancing my expertise in Salesforce customization, automation, and security.

Declaration:

I hereby declare that the above Written Particulars are true to the best of the Knowledge and belief.
