PROFESSIONAL EXPERIENCE

Light Finance Corp.

January 2024 - Present

Senior Business Analyst and Product Manager

Managed key projects in digital payments, UPI systems, lending, and loan management. Led API integrations for effective communication between fintech platforms and backend systems, ensuring regulatory compliance and enhancing operational efficiency. Contributed to improving user experience and optimizing financial workflows.

Key Activities:

- Spearheaded the creation of digital currency and UPI payment systems, leading to a 25% increase in transaction success rates.
- Developed and executed a Loan Management System (LMS) that optimized loan processing and cut approval times by 20%.
- Oversaw API integrations with external banking and financial systems, facilitating real-time updates and enhancing overall system reliability.
- Worked alongside cross-functional teams, utilizing data analytics (Power BI) to derive insights that informed product decisions. Partnered with regulatory bodies to ensure compliance, resulting in timely and successful product launches.

Cygnnet Digital

January 2023 - December 2023

Senior Business Analyst

Led design and development of fintech, legal, and taxation projects, emphasizing complex API and third-party software integrations. Delivered innovative legal solutions using AI/ML to automate processes like notary workflows, enhancing accuracy and efficiency in legal operations.

Key Activities:

- Oversaw a legal notary portal that utilized AI/ML for automating document validation, reducing processing time by 30%.
- Integrated third-party software and APIs to enhance functionality and scalability in legal and fintech products, while also defining product requirements for API integrations in collaboration with business and technical stakeholders.
- Applied Agile methodologies to ensure projects were delivered on time and met client specifications.

Dash Technologies
Senior Business Analyst

2021 - 2022

Led high-impact projects in various sectors, including construction, e-commerce, AI/ML, political surveys, trucking, gaming, and insurance. Managed product delivery from requirements gathering to deployment, focusing on stakeholder alignment and cross-industry innovation. Implemented AI/ML solutions for data-driven insights, improving client business outcomes.

Key Activities:

- Managed AI/ML projects for political surveys, enhancing real-time sentiment analysis and decision-making.
- Worked on healthcare projects that involved HIPAA-compliant systems and patient data management, resulting in an 18% improvement in healthcare operations.
- Led an insurance project to integrate third-party data, streamlining claim processing and risk assessment.
- Collaborated with developers and stakeholders to integrate construction management tools, increasing operational efficiency.
- Coordinated initiatives in trucking and gaming to optimize platform performance and user engagement using data-driven methods.

Annex Infotechnologies
Sales and Client Relationship Manager

2018 - 2020

Led major projects for government clients in mobility, transportation, and smart city initiatives, facilitating digital transformation of city infrastructure through advanced business and data analysis. Developed tailored solutions to meet government needs, ensuring successful project outcomes.

Key Activities:

- Managed smart city solutions to enhance public service efficiency and urban mobility using IoT and data insights.
- Designed intelligent transportation systems for real-time tracking, improved traffic management.
- Led the development of digital platforms for government operations, driving process automation and improving service delivery.
- Developed documentation (BRD, FRS, SRS) to guide cross-functional teams and meet stakeholder objectives.
