## Summary

With 2.3+ years of experience in Salesforce Development, I am skilled in Apex Programming, Lightning Web Components (LWC), Salesforce Flow, Salesforce Configuration, Data Security Model, Asynchronous Apex, and Deployment Utilizing Salesforce CLI.

## Experience

### Salesforce Developer

PwC India

Aug 2022 - Aug 2023 (1 year 1 month)

Improving Case Resolution and User Adoption: Enhanced case resolution time by 10% through efficient handling of tickets from diverse channels.

Custom Apex and Triggers Development: Designed custom Apex code and triggers to integrate and manage tickets from various channels seamlessly, meeting specific business requirements.

Conducting User Training and Ongoing Support: Conducted user training sessions to ensure proficient utilization of the Salesforce platform for handling tickets from diverse channels. Provided continuous support to users for effectively managing tickets and ensuring high levels of customer satisfaction.

Lightning Web Components (LWC): Proficient in developing Lightning Web Components to create interactive responsive user interfaces for managing tickets from various channels within Salesforce.

Asynchronous Apex: Utilized Async Apex to handle complex processes asynchronously, improving system performance and experience in handling diverse channel tickets effectively.

Managing User Profiles and Security: Oversaw user profiles, roles, and security settings specific to diverse channel ticket management to maintain data integrity and information security within the Salesforce environment.

### Salesforce Developer

Venerate Solutions (Acquired by PWC)

Jun 2021 - Jul 2022 (1 year 2 months)

Shadowing Senior Developers: I gained valuable experience by shadowing senior developers in their daily responsibilities, learning best practices and gaining insights into complex development tasks.

Lightning Web Components (LWC) Development: Developed robust and interactive Lightning Web Components to enhance user experience and functionality within Salesforce environments.

Custom Apex Classes Creation: Crafted custom Apex classes to support complex business logic and functionality tailored to specific project requirements.

Experience Cloud Hands-On Experience: Demonstrated proficiency in configuring and optimizing Experience Cloud to create seamless user experiences and drive customer engagement.

Agile Methodology Implementation: Adhered to Agile practices like daily stand-up meetings, sprint planning, and retrospectives to foster collaboration, align on project goals, and ensure timely delivery of high-quality solutions.
