

EDUCATION

- **Indian Institute of Technology (IIT) Roorkee** Roorkee, Uttarakhand
Bachelor of Technology, Engineering Physics, CGPA: 8.08 July 2017– June 2021

TECHNICAL SKILLS

- **Salesforce Technologies:** Salesforce Platform Development, Salesforce Vlocity Development, Apex Programming, Apex Triggers, SOQL, SOSL, Batch and Scheduled Apex, Dataraptors, Integration Procedures, OmniScripts, FlexCards, Calculation Matrices, Calculation Procedures
- **Other Skills:** Java, Javascript, Git, Data Structures and Algorithms, Python, Machine Learning, Deep Learning

SALESFORCE CERTIFICATION

- **Salesforce Certified Platform Developer-1:**
- **Salesforce Certified Omnistudio Developer (Salesforce Vlocity Developer):**
- **Salesforce Certified AI Associate:**

EXPERIENCE

- **Wipro** Greater Noida, Uttar Pradesh
Sr. Software Engineer July 2023 - Present
 - **Project Overview:** Worked on developing a custom Sales application built on Salesforce platform for a German Telecommunication company to cater their B2B customers.
 - **Improved Quote Management:** Improved the Quote creation process and increased its efficiency by 60% as compared to the legacy system.
 - **Omniscritps & Flex cards:** Developed omniscritp & Flex cards to assist sales agent in onboarding new customers & place orders. It reduced the data issues in Account, Quote, Contract and Orders by 80%.
 - **Customizing Vlocity & Salesforce Components:** Developed Vlocity components such as data raptors and integration procedures to extend Vlocity functionality and integrate with external systems. Developed, and implemented custom Salesforce solutions, including custom objects, workflows, validation rules, and process automation to streamline business processes.
 - **External Application Integration:** Integrated Salesforce with external systems using REST and SOAP web services.
- **Wipro** Greater Noida, Uttar Pradesh
Associate Consultant July 2021 - July 2023
 - **Report & Dashboard building:** Developed reports and dashboards to aid the operations team in monitoring any failures occurring throughout the order activation journey.
 - **Validation Rules & Flows:** Built Validation Rules to ensure data consistency & preventing users from entering incorrect or incomplete information into records.
 - **Defect Handling:** Addressed multiple UAT and production defects, promptly delivering resolutions within specified timelines.

OTHER PROJECTS

- **Ozone Density Predictor:** Developed a cutting-edge Machine Learning Model utilizing Artificial Neural Network and Auto Encoders, based on data collected from NASA's TIMED satellite, to accurately predict Mesospheric Ozone density during solar storms with high precision.
- **Solar Storms Predictor:** Developed a Deep Learning Model which can predict the occurrence of Solar Storms with 98 percent Accuracy. The model incorporates a multi-layered Recurrent Neural Network with LSTM units.
