## Project Experiences (Salesforce)

### Project Title - Property Finder App (PFA)

Duration: Mar 2023 - Present

Module Description: Develop a robust property search app using the Salesforce platform, incorporating custom objects such as property, agent, agent commission, and price. The app enables seamless property transactions, automated commission calculations, and customer notification via email.

#### Responsibilities:

- Designed and implemented a **custom object model** to represent properties, agents, Commissions, and pricing information.
- Developed a **user-friendly UI using Lightning Web Components (LWC)**, ensuring an intuitive and visually appealing experience for both Salesforce administrators and users.
- Implemented a **commission calculation feature** that automatically calculates agent commissions upon property sales, reducing manual effort and improving accuracy.
- Enabled **real-time customer notifications by integrating email functionality**, ensuring timely updates on newly listed properties.
- Facilitated property management by allowing Salesforce administrators and users to upload property photos and descriptions directly through the app.
- Lightning Web Components (LWC): Created a modern and responsive **UI using LWC**, taking advantage of reusable components and efficient data handling.
- **Custom Object Modeling:** Designed a comprehensive data model comprising Property, Agent, Agent Commission, and Price objects, establishing clear relationships and optimizing data storage.
- Automation: Implemented **automated commission calculations** upon property sales, reducing manual effort and **minimizing errors**.

### Project Title - Student Registration System

Duration: May 2022 – Feb 2023

Module Description: Designed and developed a comprehensive student registration and examination portal, seamlessly integrated with a WordPress website. The portal enables efficient storage and management of student information and exam registrations, with all data automatically stored in Salesforce's Leads section.

#### Responsibilities:

- Created a user-friendly **web-to-lead** form that allows new students to register and submit their information securely through the **WordPress website**.
- Implemented Salesforce integration to automatically capture and store student registration and exam information in real time, eliminating manual data entry and ensuring data accuracy.
- Designed a **centralized database structure within Salesforce**, utilizing the **Leads** section to store and manage student records efficiently.
- Developed **validation and error-handling mechanisms** within the portal to ensure data integrity and provide a smooth registration experience for students.
- Collaborated with stakeholders to gather requirements, design the portal's user interface, and ensure seamless integration with the existing WordPress website.

### Project Title - PharmaMed (An Online Pharmacy Store)

Duration: Aug 2021 – Apr 2022

Module Description: An application that helps pharmacists manage medicines in the store, billing, and

inventory. Oversees the management of the product inventory, including medicines and healthcare products. Manages all aspects of customer interactions, including registration, login, and profile management. Manages the entire order lifecycle from initiation to fulfillment. Handles the submission, verification, and processing of customer prescriptions.

### **Responsibilities:**

- Worked on the design of custom objects, custom fields, roll-up summary fields, and formulae to implement business logic.
- Involved in **security levels and privileges** by customizing.
- Salesforce.com profiles and roles along with **sharing rules and permission sets**.
- Role-based page layouts, record types, custom tabs, reports, and dashboards as per the application requirements.
- Roles such as admin, pharmacist, customer support, inventory manager, and customer, each with specific **permissions and access levels**.
- Manages the order lifecycle, including payment confirmation, inventory deduction, and shipping initiation by process builder; Generates prescriptions for the customers.
- Use **Salesforce Sandboxes** for development, testing, and user acceptance testing (UAT) before deploying to the production environment.

### **Education Qualifications**

| Exam/Degree                           | School/College                               | Board/University | Year of Passing | % / CGPA |
|---------------------------------------|----------------------------------------------|------------------|-----------------|----------|
| <b>B.E (Aeronautical Engineering)</b> | Priyadarshini College Of Engineering, Nagpur | RTMNU            | 2016            | 8.05/10  |
| <b>12th (Science)</b>                 | Santaji Mahavidyalaya, Nagpur                | Nagpur Board     | 2012            | 61.17    |
| <b>10th</b>                           | South Point School, Nagpur                   | Nagpur Board     | 2010            | 84.18    |

### **Certifications**

- Salesforce Certified Administrator (SCA)
- Salesforce Certified Associate

### **Honors & Recognitions**

- Awarded as the best player in the team and promoted to Salesforce Developer.
- Recognized in Neel Infratech for her valuable contribution to business development activities.
