- Experience in writing **SOQL** and **SOSL** queries.
- Experience in SFDC Customisation of **Reports** and **Dashboards.**
- Proficient in **Data Migration** from traditional applications to Salesforce using **Data Loader, Import Wizard, Workbench, and Dataloader.io**

EXPERIENCE

Salesforce Developer

PwC

04/2022 - Present | Pune

- Working on analyzing, highlighting, and implementing user stories.
- Designed, set up, and maintained Salesforce standard objects, custom objects, and junction objects.
- Implement pick lists, lookups, master-detail relationships, page layouts, and record types to ensure data quality.
- Designing Home Pages that present value to the user, with data-rich dashboards and lists.
- Implementation of custom approval processes to allow users to approve associations between objects.
- Managed and created complex flows and validation rules.
- Designed, developed, and deployed Apex classes and Apex triggers for various functional needs in the application.
- Created email templates, configured workflow rules and approval process.
- Worked on migrating data from databases to SFDC by using Data Loader, Data Import Wizard, and Dataloader.io
- Implemented security and sharing rules at the object, field, and record levels, and created roles according to the organizational hierarchy.
- Created various profiles and configured permissions for organization users.
- Creation of dashboards and reports to meet user needs.
- Provided ongoing maintenance and development of bug fixes.
- Implemented the best practices for constructing Apex Triggers and Apex Classes.

Jr. Software Engineer

Infogen Labs

02/2022 - 03/2022 | Pune
