mPHATEK Systems Private Limited, Pune

Nov'2020- Apr'2021

Software Engineer

- Managed smooth updates for existing Salesforce projects to keep them up-to-date with the latest features.
- Used Salesforce.com CRM tools like Visualforce, Apex, Triggers, Workflows, Lightning, and Java Technologies.
- Showed skill in using Force.com Apex Classes, Apex Triggers, and Visualforce.
- Hands-on experience in setting up systems, managing users, controlling security, organizing data, and creating user roles and profiles.
- Played a key role in creating custom features like new data fields, layout designs, automated processes, and reports.
- Designed easy-to-use Dashboards and made sure emails were generated as needed.
- Expertise in moving data and deploying code using data loader tools.

Projects:**Service Credit Union**

- SERVICE CU is a credit union bank from the USA serving various banking facilities like Loans, Accounts, Insurance, etc.
- Service CU has various legacy systems from where they process their customer data.
- The problem they are facing with their legacy systems is that customers' data is stored in various legacy systems so if they need to check/process that data they need to login to various legacy systems.
- So, to solve this problem they are replacing their legacy systems with one CRM platform called Salesforce.

Management System of Insurance

- Online Insurance is a web application which is used to tracking the details about the insurance policy, customer details and company details.
