

Sahil Verma

Mobile Application Developer | React Native & Frontend

sahilverma22501@gmail.com +91-8905971325 github.com/sahilverma22501 linkedin.com/in/sahilverma

Professional Summary

Passionate Computer Science student specializing in Mobile Application Development with hands-on experience building scalable and user-friendly applications using React Native and modern JavaScript frameworks. Skilled in designing responsive UI, integrating APIs, and developing real-world applications with Firebase and backend services.

Technical Skills

- **Mobile Development:** React Native (Expo), Android Development Basics
- **Frontend:** React.js, HTML, CSS, JavaScript, Redux
- **Programming Languages:** JavaScript, Python, C++
- **Backend & APIs:** Firebase (Authentication, Firestore, Storage), REST APIs
- **Tools & Platforms:** Git, GitHub, VS Code, Expo CLI, n8n
- **Other Skills:** Data Structures & Algorithms, Problem Solving, Debugging

Experience

Software Development Intern

June 2025 – July 2025

Linkx Digital

- Worked on real-world software solutions involving data processing and backend integration
- Developed and optimized application logic using Python and REST APIs
- Collaborated on building scalable workflows and improving system efficiency
- Gained experience in debugging, testing, and improving application performance

Projects

RxSave — AI-Powered Affordable Medicine Finder App *React Native · Firebase · Google Gemini AI · OCR · n8n*

Full-Stack Mobile Application | AI Integration | Healthcare Tech

- Architected and shipped a production-ready cross-platform mobile application (iOS & Android) using **React Native (Expo)** that empowers users to reduce medicine expenditure by **60–90%** through AI-driven generic alternative recommendations
- Engineered an **end-to-end prescription digitization pipeline**: integrated OCR.space API for automated image-to-text extraction from handwritten/printed prescriptions, then processed extracted data through **Google Gemini AI**
- Built a **real-time geolocation search engine** using OpenStreetMap Overpass API to surface nearby pharmacies stocking generic alternatives, ranked by proximity and availability
- Implemented scalable backend infrastructure using **Firebase** (Authentication, Firestore NoSQL database, Cloud Storage) supporting multi-user sessions, secure data persistence, and real-time sync across devices
- Designed **autonomous notification workflows** using n8n — including price drop alerts and medication refill reminders — reducing manual follow-up effort and improving user medication adherence
- Adopted **Zustand** for lightweight global state management, enabling a modular, maintainable component architecture with clean separation of concerns
- Delivered a seamless UX with **sub-3-second prescription scan-to-result latency**, integrating three third-party APIs within a single cohesive user journey

Education

B.Tech in Computer Science

Expected May 2027

Swami Keshvanand Institute of Technology, Management & Gramothan (SKIT), Jaipur

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems

- Class XII — CBSE (2022)
- Class X — CBSE (2020)
