

PRAVEEN DHAR DWIVEDI

Salesforce Developer | Apex & SOQL | Lightning Web Component
praveendwivedi1245@gmail.com | [Trailhead](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Salesforce Developer with hands on experience in Apex, LWC, and SOQL. Passionate about building scalable Salesforce solutions and contributing effectively to projects.

EDUCATION

Bachleors of Science in Computer Science

Nov 2022 - Jun 2026

Deshbandhu College, University of Delhi (DU)

Class XII (PCM with Computer Science)

Apr 2021 - May 2022

Fatima Senior Secondary School, Gonda - Uttar Pradesh

EXPERIENCE

Salesforce Developer Intern

Jun 2025 – Sept 2025

Info Edge (India) Ltd.

- Gained hands on experience in **Salesforce Administration**, including user management, profiles, roles, OWD, validation rules, and **data handling** with **Data Loader**.
- Built and optimized automation solutions using **Flows**, **approval processes**, **SOQL**, and developed basic **Apex triggers** for business logic implementation.
- Worked on a guided project in **Sales Cloud**, implementing lead automation, creating a **Lightning Web Component (LWC)**, and writing test classes to ensure code quality.

PROJECTS

Tours & Tourism App

- Developed a Salesforce CRM app with **5+ custom objects**, **20+ fields**, and Lightning Web Components (LWC) to manage tour packages, customer bookings, payments, and journey details.
- Automated booking workflows using **Salesforce Flow**, **Apex triggers**, and **Validation Rules**, improving accuracy by 80%.
- Created **8+ reports** and **3 dashboards** with **SOQL** queries for insights, and integrated data via **Data Loader & Workbench** for efficient business tracking.

Employee Service & Asset Management App

- Designed an application in Salesforce to handle employee service requests and asset tracking (laptops, IDs, etc.) with **custom objects**, **Visualforce pages**, and **Lightning Web Components**.
- Streamlined request assignment and approvals using **Flows**, **Apex logic**, and automated notifications, which reduced manual follow-ups and improved resolution speed.
- Delivered actionable insights by configuring custom reports and dashboards, while leveraging **SOQL queries**, VS Code, and **Git/GitHub** for backend operations and version control.

TECHNICAL SKILLS

- Salesforce Technologies: Apex, Visualforce, Lightning Web Components, SOQL, Salesforce Flow
- Tools: Salesforce Developer Console, Data Loader, Workbench, Advance Excel
- Languages: Java, Python, SQL, HTML, CSS, JavaScript
- Tools & Platforms: MySQL, Git/Github, Docker, Visual Studio Code, Postman, IntelliJ Idea
- Core Concepts: Data Structures and Algorithms, OOPs, DBMS

ACHIEVEMENTS

- Completed 45+ Salesforce Trailhead modules and Superbadges, building a strong foundation in Apex, SOQL, and Flows.
- Designed and deployed 2 Salesforce applications in Developer Playground, showcasing ability to translate business needs into functional CRM solutions.
