12th CBSE(PCMB) - Percentage – 70.5%
- **Blessed sacrament high school,Puri** **2020**
10th ICSE – Percentage – 72.83%

PROJECTS

Banking Management System using Java, MySQL, JDBC

- This is a basic banking system application which will allow users to perform common banking transactions such as creating accounts, depositing, withdrawing, checking balances, and transferring funds.
- The application leverages MySQL as the database to store all banking-related information, and JDBC is used to connect Java with MySQL, ensuring efficient communication between the application and the database.

Smart Health prediction System using HTML,CSS,JavaScript

- Developed a web-based Smart Healthcare Prediction System using HTML, CSS, and JavaScript to predict health risks based on user inputs like age, gender, blood pressure, and cholesterol.
- The system provides instant condition analysis, health alerts, diet recommendations, previous health record tracking, and displays top doctor referrals across India with contact details. Designed a user-friendly, responsive interface focused on preventive healthcare and early diagnosis

Movie Trailer App using HTML, CSS, JavaScript

- This Project is a movie information website that utilizes data from TMDB (The Movie Database)
- In this website you'll find essential information like posters, genres, ratings, directors, cast, and even trailers.
