TECHNICAL SKILLS

Domain	: Salesforce.com
Salesforce Technologies	: Force.com, Apex, Lightning, Visual force and Apex Triggers, LWC
Tools	: Data Loader, Data Import Wizard,
Web Languages	: HTML, CSS, Visual force
Web Services	: REST API

CERTIFICATION DETAILS

- Salesforce Certified Associate
- Salesforce Administrator
- Platform Developer-1

EDUCATIONAL QUALIFICATION

- B.sc Computer science (BSC) at Sree Konaseema Bhanoji Ramars College ,Amalapuram

PROJECT SUMMERY

Project #1:

- ✓ **Title** : Weatherman Umbrella
- ✓ **Client** : Weatherman Umbrella
- ✓ **Role** : Salesforce Developer

Project Description: Weatherman Umbrella, a leading manufacturer and distributor of high-quality umbrellas, embarked on a Salesforce project to leverage the Commerce Cloud and Order Management System (OMS) capabilities. The project aimed to enhance the e-commerce platform and streamline the order fulfillment process through integration with the Vera core Warehouse Management System and this project on Salesforce involved the development of a comprehensive solution to streamline the sales process and enhance order management capabilities.

Roles and Responsibilities:

- Involved in Salesforce.com Application Setup activities and customized the apps to match the functional needs of the organization.
- Complete Sales Flow Development: I developed the entire sales flow for the B2B process, ensuring seamless order management and customer interaction.
- Custom Object and Field Creation: Based on the specific requirements of Weatherman Umbrella, I created custom objects and fields within Salesforce to capture and store relevant data accurately.
- Implemented automated lead distribution and an approval process to streamline sales team operations and decision-making.
- Using Salesforce's Process Builder and Flows, I designed and configured various automation processes to optimize the efficiency of business operations. This included automating tasks, notifications, and data updates based on predefined criteria.
- Worked extensively on configuring and managing products, price books, quotes, and orders within Salesforce. This involved defining different price books based on the account type and ensuring accurate assignment of products and pricing.
- Created custom Visual force pages to tailor the quote generation process according to Weatherman Umbrella's unique requirements. Additionally, I designed email templates to deliver personalized and professional communications to customers.
- Integration with Warehouse Management System (WMS): To streamline order processing, I developed Apex classes to integrate Salesforce with the WMS. This integration facilitated the seamless transfer of both B2B orders and store-front orders to the WMS for fulfillment.
- Order Status Tracking and System Updates: I implemented mechanisms to retrieve order status updates from the WMS and updated the Salesforce system accordingly. This ensured real-time visibility into order progress and enhanced customer satisfaction.
- Worked with Apex Classes, and Apex Triggers, Lightning Web Components.
- Created test classes for apex classes.

Project #2:

- **Title : Knowledge Hut**
- **Client : Knowledge Hut**
- **Role : Salesforce Developer**
-

Project Description: KnowledgeHut is a global training provider, helping professionals and organizations across industries and sectors develop the skills they need to succeed in today's fast-paced world. With a wide array of courses, workshops, and boot camps, we equip individuals and teams with in- demand skills, enabling them to stay relevant and thrive in their careers.

Roles and Responsibilities-

- Established integration between Hub spot and SFDC to seamlessly transfer Hubspot data into SFDC. Enabled the flow of Hub spot data into SFDC by integrating the two platforms.
- Involved in Metadata Deployment activity during UAT, Production environment by using change sets.
- Successfully managed data deployment for standard and custom objects, implementing a comprehensive data migration strategy that involved extracting, transforming, and loading data to meet the requirements of the target org
- Created Page Layouts, Search Layouts to organize Fields, Related lists and other components on record detail pages and edit pages.
- Created workflow rules and defined related Tasks, Time Triggered Tasks, Email Alerts, Field Updates to implement business logic
- Developed Apex Classes and Apex Triggers for various functional needs in the application
- Created users, roles, public groups and implemented role hierarchies, sharing rules and record level permissions to provide shared access among different users
- Created profiles and implemented Objects and field level security to hide critical information on the profile users.
- Developed a custom object mirroring a standard object, such as Opportunity Line Items, to establish distinct record types
- Develop a workflow mirroring the standard process for creating quotes and their corresponding line items.
