PERSONAL PROJECT

Real Estate Management Software

- Developed and administered a Salesforce CRM solution for a leading real estate organization.
- Designed the application, worked on lead management processes and customized standard objects including Leads, Accounts, Contacts and Opportunities.
- Created custom objects to store organization data as per business requirements.
- Customized Page Layouts, Field Level Security, Organization Wide Defaults and Sharing Rules, Profile Settings, Validation Rules and Workflows.
- Developed Triggers using Apex programming and created customized Visualforce pages using standard and custom controllers.
- Worked extensively on implementation and customization of the business model.
- Imported and exported records using Data Loader and developed code coverage test classes for migrating code to the production environment.
