Address: Pune, Maharashtra

EDUCATION

- **Bachelor of Engineering - Information Technology** Pune, Maharashtra
Savitribai Phule Pune University; CGPA: 7.82
Subjects: Operating Systems, Data Structures, Analysis Of Algorithms, Object Oriented Programming, Machine Learning, Networking, Databases, Cloud Computing, Computer Graphics, Data Science and Big Data, WEB Application Development, Cyber Security

SKILLS

- Expertise in architecting comprehensive Salesforce solutions, including the development of **Custom Objects, Fields, Lookup and Master-Detail relationships, Junction Objects and Roll-up summary fields**.
- Competence in configuring complex Salesforce components, including **Validation Rules, Formula fields, Record Types, Lightning Pages, Page Layouts, and Custom Page layouts**. Skilled in creating **Duplicate Matching Rules** and leveraging **Schema Builder** for efficient data modeling.
- Proven expertise in multi-tiered data security, ensuring robust protection at organization, object, field, and record levels using **OWD, profiles, permission sets, permission set groups, role hierarchy, sharing rules, and manual sharing**. Specialized in configuring Salesforce profiles, strategically **allocating roles, and expertly managing access** to ensure optimal security and functionality.
- Extensive experience in developing sophisticated **automations using Flows**, including **Screen Flow, Record-Triggered Flow, and Scheduled-Triggered Flow**. Expert in designing **Approval Processes** for automated alerts, dynamic field updates, and seamless email generation.
- Adept at crafting insightful **Reports and Dashboards** to ensure high data quality and integrity, empowering informed decision-making.
- Well-versed in developing robust **Apex Classes, Triggers, and Test Classes, utilizing Context Variables, Visualforce Pages, SOQL, and SOSL** to optimize both standard and custom objects.
- Accomplished in leveraging **Data Loader** for seamless data manipulation, encompassing insertion, updating, upserting, deletion, and **bulk import/export** of Salesforce records. Additionally, possess adept knowledge of **HTML, CSS, Bootstrap, JavaScript, and SQL** for comprehensive development capabilities.

CERTIFICATIONS

Salesforce Certified Administrator (Credential ID: 3917906) (Certificate Link)

TRAILHEAD BADGES COLLECTION (PROFILE LINK)

- Earned **83** Trailhead Badges, **52,625** points and **Expeditioner Rank** through different trailhead modules.

PROJECTS

- **Travel App On Salesforce (Skills : fields and relationships, validation rules, page layouts) (Link):**
 - Designed and developed a **custom lightning app** for streamlined travel request approvals, creating **custom objects** like Departments, Travel Approvals, and Travel Expenses.
 - Implemented **Flows and Approval processes** using automated alerts, field updates, and email generation. Developed **custom lightning components, list views, reports and dashboard** for enhanced user experience.
- **Recruitment App On Salesforce (Skills : objects, fields, relationships, record types, page layouts) (Link):**
 - Developed a robust data model for a Salesforce recruiting app, utilizing **custom objects, junction objects** like Job Application, Candidate, and Interview. Implemented advanced **Lookup, Self and Master-Detail relationships** to ensure data integrity and streamline management. Applied **field creation and dependency configurations**, and set up **validation rules** to enhance accuracy. This project highlighted my proficiency to create scalable solutions for recruitment processes.
- **Personal Portfolio On Salesforce (Skills : Experience cloud, page creation, cloud sites domain) (Link):**
 - Crafted a dynamic portfolio on Salesforce with expertise in **custom theme layouts, Lightning component utilization, content organization, and publishing site**, demonstrating strong skills in Salesforce customization and impactful content delivery.
- **Permissioned Blockchain and Efficient Healthcare IOT (Skills : Java Swing, Amazon RDS, RCC algorithm):**
 - As a collaborative effort in a group project, we implemented robust **data encryption** using the **Reverse Circle Cipher algorithm** to secure medical IoT device data on **Amazon RDS**, coupled with a user-friendly **Java Swing interface and Java language** for efficient data retrieval, showcasing adept skills in data security and software development.
