- **H.S.C:-** Completed 10<sup>th</sup> from A.H.A.G.I.C. Ujjar Dudhara Sant Kabir Nagar with 72% in 2012.

## EXPERIENCE/INTERNSHIP-

- **Working with Logicrays Technologies, Ahmedabad, as a Salesforce Developer from July 24, 2023, to Present**

### Responsibilities-

- ★ I am working as a Salesforce Developer with good hands-on experience in Apex, LWC, Vlocity, Omnistudio, Trigger, Javascript, VF Page, code reviews, and unit testing as well.
- ★ I have hands-on experience in debugging and problem-solving as well.
- ★ My commitment to excellence is evident in my role as a meticulous code reviewer and advocate for comprehensive unit testing.

- **I worked with Qrious Tech Team LLP, Ahmedabad, as a Salesforce Developer from January 1, 2022, to July 11, 2023**

**Responsibilities-**

- ★ I joined Salesforce as a trainee, and within 5 months I started working on a live project with my good hands-on skills, which have given me real-time experience.
- ★ After a couple of months, I was promoted to Salesforce Developer at Qrious Tech Team LLP, where I learned valuable professional skills such as "Apex, Tigger, Postman, SOQL, SOSL, Integration, LWC, Salesforce Admin, and JavaScript, financial cloud.
- ★ I have good experience in debugging analysis and finding evocative solutions.

**PROJECT DETAILS:**

**Project Name: Restaurant E-Management System**

**Role: Salesforce Developer**

**Responsibilities:** My role is to work on the front-end and back-end, custom development, configuration enhancements, Visualforce and Lightning component development, data management, apex triggers and batch processes, collaboration, code optimization and performance tuning, security implementation, release management, documentation, and new implementations.

**Skills Used:** Apex, Trigger, SOQL, SOSL, LWC, Integration, Mulesoft, Omniscripts, different types of data raptors, VisualForce, Process Builders, and Flows, FlexCards, and DataRaptors serve for retrieving, transforming, and integrating procedures in the Salesforce IDE.

**Cloud:** Commerce Cloud, Experience Cloud

**Description:** Salesforce developers play a crucial role in transforming business requirements into effective solutions within the Salesforce platform, contributing to the overall success of organizations leveraging Salesforce for their CRM needs. A customer searches the menu on the table-side mobile device.

**Project Name: Original Works**

**Role: Salesforce Developer**

**Responsibilities:** My Role was to work on the front-end and back-end, Custom Development, Configuration enhancements, Visualforce and Lightning Component Development, Data Management, Apex Triggers and Batch Processes, mulesoft, Collaboration, Code Optimization, and Performance tuning; Security implementation; Release management; documentation; and new Implementations. I was more focused on the backend part, as the project had external websites for the front-end part.

**Skills Used:** Apex, Conga Composer, Aura, LWC, Trigger, SOQL, SOSL, Integration, VisualForce, Process Builders, Flows, and DataRaptors serve for retrieving, transforming, and integrating procedures.

**Cloud:** Sales Cloud, Experience Cloud

**Description:** Implement logic for integration with Sales Logix and Magento in Salesforce. It was an e-commerce Portal for multiple customers and Portals for summer, and winter products, Coupons, Service Requests, etc. for customers to Apply for Credit after the successful purchase of appliances. Integration with PHP.

**Project Name:** Forrester

**Role:** Salesforce Developer

**Responsibilities:** I used to work on the backend part, where I mostly focused on the custom-built LWC to support the Sales Reps in using the system and guiding the customers. Also, I have integrated multiple systems and implemented Trigger Framework.

**Skills Used:** Apex, Data.com, Rest API, LWC, Trigger, Process Builder, Flow, Trigger, SOQL, SOSL, JavaScript, financial cloud.

**Cloud:** Sales Cloud

**Description:** Data migration from data.com to Dun & Bradstreet optimizer. Implemented integration with D&B Optimizer using REST APIs. Made code changes and configurations required for the migration. Configured Process Builders, Flows, and Data Integration rules as per the client's requirement.
