PROJECT

ASSURANT: Insurance and Financial Services

Description: Various Insurance covered under the American Express Like Car, Health, Travel. Users can login and log their claims through Portal. Portal also manages to generate various communications to the customer related to their claims.

EAB: Education

Description: Cloud-based software solution that provides Education related solutions. Manage customers' and vendors' data for better service and business growth. In this project offshore and onshore both teams were working together. We used to have feature development and running software maintenance.
