PROJECTS

Major Project :- AADHAR CARD AND FINGERPRINT VOTING SYSTEM (01/2022 - 04/2022)

- This project is Arduino-uno based prototype model to make a two tier security for each vote. As we know, a major controversy in conducting elections in India is fake voters. The objective of this project is to reduce fake voters.

Minor Project :- AUTOMATIC ROOM LIGHT WITH VISITORS COUNTER (10/2021 - 12/2021)

- This project is an Arduino-uno based prototype model to count the number of persons visiting in a particular room and lighting up the room accordingly. The main objective of this project is to save electricity while not using it.

Salesforce Project :- RECRUITMENT APPLICATION (08/2022 – 11/2022)

- It is a Salesforce application for Managing Position, Candidates and Job Applications and track job position on employment websites.

Responsibilities :-

- Worked on Salesforce standard objects (accounts, contacts, leads, Opportunities).
- Created Custom objects, formula fields, and design validation rules page layouts, workflow rules
- Create profiles, and roles and configure permissions according to organizational hierarchy requirements.
- Developed Apex classes and Triggers and linked them to manage the workflows.
- Used SOQL and SOSL for Data manipulation needs of the application using platform Database Objects.
- Responsible for writing SOQL queries and DML.
- Defined the lookup relationship and master-detail relationship on the objects that help in associating the record. Defining a parent-child relationship in which the master object controls certain behaviors of the detail object respectively.
- Effectively created the pick lists, dependent picklists, and junction objects to establish the connectivity among objects.
- Created user Roles and Profiles and gave them Security controls and shared settings.
- Maintaining profiles roles and Standard Objects like user Accounts, Contacts, Leads, Campaigns, Dashboards, and Reports.
- Created workflow rules and defined related tasks, time-triggered tasks, email alerts, and field updates to implement business logic.
- Performed the roles of Salesforce.com Administrator and Developer in the organization.
