EXPERIENCE 1st

September 2021 - December 2023

Salesforce Developer, Contrivers Technologies Pvt Ltd,
Bangalore, India

1st Project: Rural Business Support - Australia

Configuration and Integration:

Configured Salesforce NPSP and Case Management for nonprofit needs. Ensured seamless integration for effective data tracking.

Team Leadership:

Led cross-functional team in solution design and implementation. Conducted regular meetings for progress tracking and issue resolution.

Data Management and Migration:

Developed data management strategies for migration. Successfully migrated data from legacy systems.

Automation (Flows and Apex):

Implemented Salesforce Flows for automation. Utilized Apex for custom functionalities.

Reporting and Analytics:

Designed robust reporting for real-time insights.

2nd Project: People2People, Recruitment Company - Australia

Org and Salesforce Release Management:

Oversaw production org, User Acceptance Testing (UAT), and sandboxes for controlled development. Stayed updated on Salesforce releases, implementing new features for enhanced functionality.

Data Migration Expertise:

Led efficient data migration for numerous objects, managing millions of records through adept data cleaning techniques.

Automation with Flows:

Designed screen and record-triggered flows to automate and optimize the recruitment process.

User Management and Data Security:

Implemented robust user management strategies, leveraging permission sets for tailored access. Implemented sharing rules for optimized record accessibility based on profiles and roles, ensuring robust data security.

Configuration and Customization:

Crafted and optimized page layouts for a user-friendly interface aligned with organizational needs.

Version Control, CI/CD, and Agile/Scrum:

Collaborated with Git for version control, establishing robust CI/CD pipelines. Followed Agile and Scrum methodologies for efficient project delivery.

EXPERIENCE 2nd

September 2007 - December 2020

Web Developer, Freelance,
Bhopal, India
