Summary

- Highly motivated and professional Executive Secretary with over 2.9 years of experience as a Salesforce Developer in Salesforce.com CRM platform across multiple industries involving building, customizing, developing and administrating on cloud applications. Good communicator who is not afraid to ask questions to understand project requirements fully.

Professional Experience

WIPRO (Client : Cynergy Bank)

Nov 2021 – Present

Saving Products

- Engineered and deployed sophisticated Salesforce solutions by architecting Apex classes, triggers, test classes, and batch classes, ensuring streamlined customer data management and internal communication optimization.
- Led the strategic customization and development of Salesforce solutions, leveraging advanced features such as custom metadata, custom labels, and the Data Import Wizard to elevate overall system efficiency and effectiveness.
- Orchestrated cross-functional collaboration to conceptualize and execute intricate Salesforce features, meticulously tailoring solutions to meet specific business unit requirements through the adept utilization of public groups, sharing rules, and org-wide defaults. Also worked on nCino manage package.
- Implemented cutting-edge automation tools including Lightning Flows to revolutionize workflow processes and elevate user experiences, resulting in tangible improvements in productivity and operational efficiency.
- Actively engaged in the Salesforce ecosystem, continuously staying abreast of emerging industry trends, best practices, and technological advancements, while also spearheading the seamless integration of Salesforce Products with Jumio for robust Identity Verification, Authentication, and Biometric Technology functionalities.

Lending Products

- Conducted comprehensive analysis of business and technical requirements, customizing standard Salesforce.com (SFDC) objects and leveraging Visualforce, Force.com API, and Web Services for tailored solutions.
- Developed diverse components, including Apex Classes, Controller Classes, Apex Triggers, and Visualforce Pages, to address multifaceted functional requirements within the application framework.
- Engaged directly with clients to promptly resolve critical production issues, ensuring seamless business continuity and exemplary client satisfaction.
- Applied advanced asynchronous Apex to optimize system performance and automate email communication. Customized Lending Product's Lightning Web Components and integrated with UK's government websites to streamline processes and improve efficiency.
- Worked on the CVN Integration (Connected Valuer Network) within the project, facilitating the generation of accurate loan quotations based on property valuation data and current market rates in the UK.
