Noida, INDIA • 9108320847 • shivastavshivi1682@gmail.com • [LinkedIn](#) • [Trailhead](#)

PROFILE

- 2 years of experience in IT, specializing in Salesforce.com Platform CRM and Force.com platform.
- Experience in Salesforce APEX classes, Batch Apex, flows, FSL, platform events, triggers, creating custom objects, tabs, validation rules and Vlocity (OmniStudio) platform with skills in integration procedures, LWC, Data Raptors, Omniscripts and Flex cards.
- Worked across various domains such as Energy and Utility and CPQ.
- Successfully completed multiple projects and earned appreciation from clients and managers.
- Committed to learning and growth within the Salesforce ecosystem, achieving multiple Salesforce-related certifications.

EXPERIENCE

SALESFORCE DEVELOPER

2022 – Present

Cloobe India Pvt. Ltd.

- Worked on OmniStudio, including data raptors, integration procedures and FlexCards applying knowledge to real-time scenarios and projects.
- Visualized Related Objects like Account, Opportunity and Lead and synced record updates in real-time, achieving efficient communication between different salesforce orgs.
- Developed solutions using Apex triggers and classes.
- Proficiently handled deployment processes.
- Analysed and met real-time requirements to develop customized solutions.

Project 1: ENOWA(NEOM)

- Enowa Neom is implemented on the Salesforce Customer 360 Platform, which encompasses various clouds such as Sales Cloud, Service Cloud, and potentially Experience Cloud (formerly known as Community Cloud).
- Led implementation of Enowa Neom project catering to Dubai-based clients, utilizing Salesforce platform alongside Vlocity.
- Utilized Salesforce core administration, Apex classes, and Lightning Web Components (LWC) to develop a customer-centric interface.
- Designed a user-friendly interface enabling customers to select products (e.g., electricity, water) based on their home's meter ID.
- Worked on enhancements and regular support tasks for the front-end user interface, ensuring smooth functioning of the applications and achieving customer satisfaction.
- Implemented backend processes using Apex to streamline product selection and installation procedures.
- Collaborated with cross-functional teams to integrate business logic and optimize user experience.

Project 2: ELECTRICAL VEHICLE ACCELERATOR

- Spearheaded the construction of a user interface tailored for electric vehicles, enabling users to seamlessly interact with and manage selected electric vehicle functions and associated E&U utilities.
- Responsibilities including developing flows, sharing rules, record level permissions and field level security.
- Played a pivotal role in implementing and customizing Salesforce Field Service solutions for our clients. By leveraging advanced scheduling algorithms and integrating with their existing systems.
- Leveraged Salesforce platform capabilities to deliver a seamless experience for the end-users.
