Projects

FinOpX

It is the ultimate solution for financial institutions that aim to revolutionize their lending, collection, and CRM processes. It helps to automate and catalyze the onboarding process for various financial services like bank account opening, credit card issuance and management, credit disbursement, etc. Dynamic frameworks created for underwriting processes are powered by AI and ML. They support in-built integrations with APIs like Karza and Twilio, OCR, and KYC validation.

Technology Used –

Apex, SOQL, Lightning Web Components, and Sales Cloud. Team Size – 7

Roles & Responsibility –

Involved in create custom UI into LWC.

Ambica Steels

Our Salesforce-powered e-commerce platform is a dynamic and user-friendly website designed to facilitate seamless buying and selling of products.

Leveraging the power of Salesforce's robust CRM capabilities, this platform offers a unique and efficient shopping experience for both buyers and sellers.
