EXPERIENCE

Makedian Softech Solution

Noida

Junior Associate - Salesforce Developer

May 2024 – Nov 2024

- Designed and implemented Lightning Web Components (LWC) to enhance user interfaces and improve overall user engagement, ensuring seamless interaction with Salesforce applications.
- Customized and optimized Salesforce functionalities through Apex programming and triggers, delivering tailored solutions to meet specific business requirements and enhance system performance.
- Built and maintained Experience Cloud sites, providing dynamic and responsive user interfaces that improved customer experiences and engagement.

AlgoCirrus Pvt Limited

Noida

Salesforce Developer Trainee

March 2023 – Oct 2023

- Salesforce Project Development:** Created and implemented multiple Salesforce projects, applying knowledge of custom objects, workflow automation, and Lightning Web Components to solve real-world business challenges.
- Apex and Lightning Skills:** Developed expertise in Apex programming and Lightning framework by building efficient, customizable solutions and improving user experience within Salesforce.
- Process Automation and Configuration:** Learned and practiced setting up process automation tools like Flow and Workflow Rules, and configured data security settings to ensure robust, scalable Salesforce applications.

PROJECTS

Welthi —Live Project

Salesforce Developer Org, Apex, Trigger, Flow

- Custom Email Templates:** Designed and implemented custom email templates using Salesforce Flow and Trigger to automate notifications, reducing manual effort and ensuring consistent communication with job owners.
- Data Accuracy Assurance:** Created validation rules and applied custom formulas to maintain data integrity, minimizing errors in automated email notifications and enhancing the accuracy of information sent to stakeholders.
- Process Automation:** Utilized Salesforce Flow Builder and Triggers to automate email notifications and record updates, significantly improving efficiency in communication and streamlining workflows across the platform.
