

Shyam Chandra Gupta

Salesforce Developer with 1.3 Years of experience in Salesforce Development and Responsible for designing, developing, and implementing the Salesforce Application.

EXPERIENCE

360 Degree Cloud Technologies Pvt Ltd, Noida, U.P

SALESFORCE DEVELOPER

May 2023 - Till Now

Role and Responsibilities

- Developed Apex triggers, synchronous & asynchronous Apex classes, and Apex test classes.
- Created Apex REST APIs and LWC.
- Managed integrations with third-party applications.
- Generated reports and dashboards, configured validation rules, formula fields, workflows, and security settings.
- Designed and implemented Salesforce Flows.
- Utilized Data Loader for data management.

Projects

Project 1: Parade

Description:

- It is a transport system management company that monitors products based on load.
- Users can create and manage records for leads, contacts, accounts, and opportunities within Salesforce.
- The system handles all types of loads and categorizes products by load on a monthly basis.
- The platform is integrated with Intercom (another CRM system) to facilitate seamless user and account creation.
- Users can view comprehensive reports and dashboards to monitor all data related to loads and transportation.
- The integration with Zapier ensures that data flows smoothly between Salesforce and Intercom, automating the creation of contacts and other records.

Tools and Technologies used: LWC, Apex class, Trigger, REST API Integration, Flow, report and dashboard, custom metadata, custom setting, field set and package bundling.

Project 2: Kevin Angle Advisor

Description: The client wants to collect product feedback from their customers, so I created a survey form for them. The client can send the survey link to the contact's email by clicking the action button. When customers complete the survey, a review record will be created in a custom object.

Tools and Technologies used: LWC, Apex, Flows, Formula Field.
