TECHNICAL SKILLS

Salesforce	Apex (Asynchronous and Synchronous), Visualforce, Lightning and Aura Components, SOQL, SOSL, Salesforce Integration (REST API), Deployment Tools (Change Sets, Copado), Flows, Salesforce Admin
Languages	Java, Python, SQL, JavaScript
Concepts	DSA, OOPs, Machine Learning, RDBMS, Microservices
Tools	Excel, PowerPoint, Python libraries (Pandas, NumPy), SpringBoot,

EXPERIENCE

Salesforce Developer | Genpact

2022 - 2024

MatchMaker and MySales Application

- Worked in the development of the MatchMaker (**Service Cloud**) application in Salesforce; optimizing project-candidate matching for upcoming projects. Also contributed to the development of the MySales (**Sales Cloud**) application at Genpact, ensuring seamless management of opportunities and projects.
- Implemented a email trigger system within Salesforce, incorporating Visualforce, Apex Classes, and Workflows to streamline opportunity tracking and approval processes.
- Developed and integrated Validation rules, Approval triggers, LWC, Aura, Apex Classes, Triggers, and Admin Tools such as Flows and Process Builder, leveraging expertise in Apex Classes, HTML and SOQL.
- Managed maintenance tasks for both applications, utilizing permission sets, sharing rules, and Salesforce's security model, in addition to other administrative responsibilities.
- Executed Deployment with regression testing of each feature using Copado, Change Sets, and Test Classes to maintain application integrity.
- Collaborated closely with cross-functional teams, including developers and stakeholders, to ensure alignment between technical specifications and business objectives.
- Analyzed business requirements, translating them into actionable User stories, Wire-frames, and Mock-ups for Salesforce applications.

Innovation Team

- Led a project integrating Salesforce with Azure NLP for personalized messages to users depicting their upcoming tasks. Utilized Lightning Web Components for UI, Python for Azure NLP integration, and Salesforce REST APIs for data exchange. Developed Apex controllers for data retrieval, ensuring seamless interaction between platforms.
- Implemented a custom chat-bot using Kore AI for comparison with Salesforce Einstein Bot, Facilitated businesses in identifying the optimal bot solution through the deployment and demonstration of both Einstein and our tailored Kore AI bot.

PROJECTS

E-book App

- Full-Stack development of a Java Web Application using ReactJS, Java Spring Boot and MySQL. Implemented RESTful APIs, Microservices, utilizing Spring Data JPA for efficient data management. Incorporated user authentication and security best practices.

Credit Card Fraud Detection

- Developed Python-based Credit Card Fraud Detection system using NumPy, Pandas, and Scikit-learn. Utilized data pre-processing techniques, exploratory data analysis, and feature selection to enhance model accuracy. Employed Machine Learning algorithms like Random Forest for robust fraud prediction. Achieved model evaluation through metrics like accuracy and precision.

Portfolio

- Created a Portfolio website using HTML CSS, JavaScript with interactive elements [My Portfolio](#).

ACADEMIC PROFILE

B.Tech (ECE), NIT Raipur,	CPI - 8.04	2022
Senior Secondary (CBSE)	Percentage - 82.4%	2018
Secondary (CBSE),	CGPA - 9.8	2016

CERTIFICATIONS

- Database Management Essentials, *Coursera*
- AWS Machine Learning, *Coursera*
- Certification on UNIX, Shell Scripting, SQL, Python, Angular, AWS, and Selenium, *Percipio*
- Copado Essential certification, *Copado*

EXTRA-CURRICULAR

- NIT Raipur's Cultural Committee's Executive member: Worked on marketing and procured sponsorship for its events.
- Event organizer: Executive member of team TEDx NIT Raipur. Organized workshops and TEDx talks within the college.
