Professional Experience:

AMS Project / NTT DATA Services

October 2023 - Present

Designation: Associate Project (Data Migration Consultant)

- Project Summary: This is a tactical implementation where PTL business (legacy systems called Interlynx and Knack) needs to migrate all related users, data, and implement / align to standard Salesforce functionalities in the Global Org. As a part of the migration process the required features of PTL Business are implemented or mapped to equivalent features in Global Org. The design is built keeping in view the defined standards used in Global org.

Roles and Responsibilities:

- Data Assessment: Evaluating the existing data landscape, including its quality, structure, and volume, to understand the scope and complexity of the migration project.
- Migration Planning: Developing a comprehensive migration strategy, including data mapping, transformation rules, and scheduling to minimize downtime and ensure data integrity.

- **Data Mapping:** Identifying source and target data fields, establishing relationships between data objects, and defining mappings to ensure that data is correctly transferred from the old system to Salesforce.
- **Data Cleansing:** Cleansing and standardizing data to ensure consistency and accuracy within Salesforce, which may involve deduplication, normalization, and validation processes.
- **Data Transformation:** Applying necessary transformations to align data from different formats or structures, ensuring compatibility with Salesforce data models and requirements.
- **Migration Execution:** Overseeing the actual migration process, which may involve using Salesforce's data import tools, custom scripts, or third-party migration tools. Monitoring the migration progress and addressing any issues or discrepancies that arise.
- **Testing and Validation:** Conducting thorough testing to verify the completeness, accuracy, and integrity of migrated data. Reconciling migrated data with the original source to ensure consistency.
- **User Training and Support:** Providing training and support to users to familiarize them with the migrated data and any changes in workflows or processes within Salesforce.
- **Documentation:** Documenting the migration process, including data mapping, transformation rules, and any custom scripts or tools used. This documentation serves as a reference for future migrations and troubleshooting.
- **Post-migration Support:** Offering ongoing support after the migration to address any data-related issues or concerns that may arise, such as data discrepancies or performance issues.

Carve Out / Schneider Electric

December 2023 – August 2024

Role: Administrator

Environment: Data loader, Workbench, Workflow Rule, Process Builder, Apex Triggers, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls
