- | | |
|------------------|---|
| Tools | : GitHub, Data Loader, Jira, Work bench, Visual Studio, Copado |
| • Administration | : Workflow Rule, Validation Rules, Approval process, Experience cloud |
| • Development | : SOSL, SOQL, Batch Apex |

ACHIEVEMENTS:

- Received several client appreciations for the individual as well as for team efforts.
- Received employee appreciation contextual mater.

EDUCATIONAL QUALIFICATIONS:

MSIT	JNTUH CEH	2021
BTech(Mechanical engineering)	JNTUH CES	2018

IT EXPERIENCE:

#	CLIENT	PROJECT	ROLE	Duration
1	Ericsson	Site Tracker	Salesforce Developer	Nov 2022 -present
DESCRIPTION: Sitetracker is a cloud-based project management software designed specifically for the telecommunications industry. It provides comprehensive tools for managing site acquisition, construction, and maintenance processes. Key features include project scheduling, resource allocation, document management, and real-time reporting. Sitetracker helps Ericsson clients streamline operations, improve efficiency, and reduce costs.				
RESPONSIBILITIES: • Involved in requirement gathering, analyzing and designing as per requirements • Implemented the Custom Settings. • Collaborated with business analysts to gather and document requirements. • Designing Roles/Profiles and Maintaining security for using profile, permission sets, object level security, record level security and field level security. • Driven post-go-live success by monitoring performance and implementing continuous improvements. • Served as the global administrator for Site tracker, managing user access, permissions, and configurations. • Taking the ownership of the tasks, coordination with the team members in meeting the deadlines • Responsible for all the activities related to configuring Data Loader, uploading data in CSV files into salesforce.com, checking for the correctness of the data. • Provided third-level technical support for Salesforce applications, resolving complex issues and ensuring customer satisfaction. • Responsible for daily client calls, status reports, issue reporting and demo calls for client • Troubleshoot and resolved incidents related to Salesforce configuration, data migration, and integration. • Analyzed and documented technical issues, identifying root causes and implementing corrective measures. • Collaborated with cross-functional teams to identify and resolve technical dependencies. • Worked on various support tickets to resolve issues for customers • Moving changes to Copado after developing the component.				
SKILLS/TOOLS USED		Salesforce Visualforce SOQL Data Loader Lightning Inspector, Lightning Components JIRA Bitbucket		

#	CLIENT	PROJECT	ROLE	METHODOLOGY
2	Verizon	Billing Migration	Developer	Agile
DESCRIPTION: Verizon is planning to migrate current billing systems (JITR Rating systems) due heavy maintenance, operational and performance costs involved in maintaining the Mainframe databases and their inflexibility to support new business initiatives, the client wanted to migrate the data from these various mainframes to a common consolidated repository under SQL Server and Cassandra.				
RESPONSIBILITIES: - Involved in Execution of Test cases and Defect logging/Tracking in Jira tool - creating and maintenance of test documentation, including test cases, test plans, and defect reports. - Raised good number of valid defects while testing different applications. - Reviewed test cases as per business requirements, ensured implementation of testing technique wherever required and coverage of positive and negative scenarios and finally get them signed off from client. - Performed Core Functionality Testing and Sanity Testing after each build. - Working with the development team to resolve priority defects. - Worked in System and Functional Testing. - Maintaining the run Book and updating the new requirements and comments. - Preparing the Traceability Matrix between the Requirements & ETAs. - Collaborated with developers to fix bugs and improve testability
