Summary

Results-driven software engineer with expertise in Salesforce and computer science, seeking challenging roles to contribute to impactful projects and excel in a professional environment

Professional Experience

❖ Salesforce Administrator Intern

Rubiktek, Virginia, US | March 2023 - March 2024

- Gained practical experience in configuration, customization, and maintenance of Salesforce solutions to meet business requirements.
- Demonstrated strong problem-solving skills and attention to detail while troubleshooting and resolving user issues enhancing customer satisfaction by 20%.

❖ Completed virtual programs at forage.com, including Deloitte and Goldman Sachs, gaining exposure to real-world business scenarios and problem-solving.

Skill Set

- ❖ Languages: Java, JavaScript, Apex, Visualforce, Lightning Web Component (LWC), SOQL, SOSL, Aura
 - ❖ Salesforce: Administration, Integration, Reports & Dashboards, Data Management, Workflow, Triggers, Data Modeling, Change Management, Automation, Security
 - ❖ Tools & Platforms: Data Loader, Google Cloud Platform (GCP), Azure, JIRA, Git, Copado
 - ❖ Object-Oriented Programming (OOP), DSA
-

Projects

1. Lecture Summarizer (Python, NLP, NLTK, Spacy) | July 2022 - Dec 2022 | [Link](#)

- Developed a summarizer that automatically generates concise summaries of lectures. Achieved a 70% reduction in time required to review lecture content while maintaining accuracy. Generated summaries with an average reduction of 80% in length compared to the original lecture. Project involved extensive coding and collaboration for success.

2. Famous Mart (HTML, CSS, JS, PHP, MySQL) | Jan 2022 - March 2022 | [Link](#)

- Developed & launched Famous Mart, an e-commerce platform. Demonstrated adept time management and adaptability, ensuring project efficiency and agility. Crafted an intuitive user interface and optimized the website for mobile devices, resulting in a notable 30% sales increase and 15% rise in average order value.

3. Helmet Detection and Number Plate Recognition (Python, OpenCV, TensorFlow, OCR)

- Led the development of a system for helmet detection and number plate recognition using Python, OpenCV, TensorFlow, and OCR. Employed analytical thinking in computer vision to enhance safety by identifying helmet usage. Also utilized image processing for precise extraction of license plate information, aiding law enforcement.

Academic Credentials

Bachelor's of Engineering (BE) in Computer Engineering

Anjuman-I-Islam's Kalsekar Technical Campus - Panvel, Maharashtra
2020 - Present | 8.4 CGPA out of 10

Coursework: Data Structures and Algorithms, Computer Networks, Operating Systems, Software Engineering, Deep Learning, Management Information System, Natural Language Processing, Machine Learning, Artificial Intelligence, DWM, Computer Architecture, System Programming & Compiler Construction, Database Management System, Cryptography & System Security, Quantitative Analysis, Discrete and Applied Mathematics

Award & Achievement

- ❖ Certified Salesforce Administrator, demonstrating proficiency in Salesforce
- ❖ Secured 1st Place in Presentation Competition at High school, showcasing effective communication skills.
- ❖ Competed in Algorithm 8.0 National Level Hackathon
- ❖ Earned Ranger Rank on Salesforce with 100+ badges, showcasing expertise and dedication [Link](#)
- ❖ Earned 40+ cloud computing, Devops badges in Google Cloud Platform (GCP), demonstrating proficiency and commitment to expanding technical skills [Link](#)
