Committed to continuous learning and skill enhancement in modern development technologies.

WORK EXPERIENCE

Cinch IT Solutions LLP

Backend PHP Developer

APRIL-JULY 2024

- Designed and developed Regex Pattern Builder Tool in JavaScript and Database Import-Export Module — for the company's web application, resulting in a 20% increase in user efficiency and 30% reduction in manual input errors.
- Made database migration efficient by enabling import/export functionality, reducing database handling time by 25%.

PROJECTS

AI Chatbot for Google Ads Automation

An AI-powered chatbot using Node.js, Express, WebSockets, Next.js, and AI APIs to collect and process user data for Google Ads campaign automation, integrated real-time AI interactions for guided data collection. This automation can enhance efficiency and save business owners' time by streamlining campaign setup

Referral credit system

A real-world business referral credit system that assigns unique referral links for each user, and credits are awarded on the successful first purchase for referring and referred users, and a real-time dashboard displays credit history, referred, and converted user metrics

InsaneGram - Let's Post It

A featured social media application developed with an intuitive and seamless UI, along with secure user authentication and a forgot password feature, post creation (with caption, images, videos), feed, real-time likes and comments, and ownership authorization

Regex pattern builder tool

A dynamic regex pattern-building mechanism using JavaScript enhances input validation efficiency by 42%

QuizoSphere:

Developed and deployed a quiz web and progressive web application (PWA) for school assessments using React.js and Firebase, improving school assessment efficiency by 40% (Actively used by a School)

CERTIFICATIONS

- MERN Stack Developer, WsCubeTech
- Drone Programming, Giftable(with High Fly Drones)
- Data Structure and Algorithm, Giftable(with Salesforce and Google)
