

Vedika Sonulkar

Salesforce Developer

Summary

Salesforce Developer with over 1 year of hands-on experience in Apex, Lightning Web Components (LWC), Triggers, and Flows, specializing in CRM customization, automation, and data security. Proven expertise in developing Task Management and HR Management CRM systems leveraging LWC, SOQL, and process automation. Certified Salesforce AI Associate, AI Specialist, and Data Cloud Consultant, holding the Trailhead Ranger rank.

Educational Background

Bachelor of Engineering in Computer Science GNIT

RTMNU University , Nagpur

- 2021

- CGPA: 8.75%

Work Experience

Salesforce Developer, Uphill Technologies Pvt. Ltd. Nagpur

August 2024 – Present

- Gained extensive hands-on experience in Salesforce platform development, leveraging Apex for robust backend logic and Lightning Components for dynamic and user-friendly interfaces.
- Engineered and deployed custom automation solutions using Apex triggers and validation rules, ensuring streamlined business processes and data integrity.
- Delivered interactive and visually appealing user interfaces using Lightning Web Components, enhancing user experience and operational efficiency.

Projects :

1. Job Portal - Recruitment Management CRM

- Developing a Job Portal using Salesforce Sales Cloud, allowing job seekers to apply for jobs and recruiters to post job listings.
- Built custom Lightning Web Components (LWC) for login, signup, job listings, and job application tracking.
- Integrated Apex controllers and SOQL queries to handle backend logic for job postings and applications.
- It helps HR teams efficiently handle job postings, manage applicants, schedule interviews, and onboard selected candidates, all in a single platform.
- The Recruitment Management application is designed to streamline and manage the end-to-end recruitment process within an organization.

2. Acknowledgement Of Content

- Worked on **Lightning Web Components (LWC)**, creating and maintaining dynamic components for **Community pages**.
- Developed **Batch Classes, Scheduled Classes, Apex Classes, and Test Classes**.
- Configured **Profiles**, implementing **Field-Level** and **Object-Level Security** to protect sensitive information.
- Designed and managed **Email Templates and Folders**
- Implemented **Custom Metadata Types, Custom Settings, Validation Rules, Custom Fields, and Email Alerts** to execute complex business logic.
- Managed **Deployments** from **Sandboxes to Production** environments.
- Built **Dashboards and Reports** for business insights and performance tracking.
- Created **Approval Processes** supporting **multi-level and multi-channel approvals**.
