- Experience on **Web services, Integration, Rest API**.
- implemented **Lightning Web Component(LWC)** for building customized component as per business requirement.

Tech Mahindra | Salesforce Developer |

Client: Optus

Nov 2021 – April 2024

I had worked in Order Management System which is used for managing customer relationships, sales, client information and related data. Responsible for analyzing business requirements and building scalable solutions using a combination of declarative tools and programmatic development.

Roles and responsibility:

- Maintain and developed the **Custom objects, Custom fields, Custom tabs**, and **Trigger, apex class** and Performed **unit testing** to implement the business logic as per the requirement.
- Developing customized solution within the Salesforce Platform.
- Involved in requirements gathering. Involved in **creating objects, Fields, Page Layouts** and **Validation Rules**.
- Used automation tools **Flows** to streamline the process.
- Used **Data Loader** to load various data in the Application like Account and Contacts and Update those data and many more.
- Integrated Salesforce with external systems using **REST API**.
- Participated in regular **Agile sprint planning**, stand-ups, and retrospectives to ensure timely delivery of high-quality solutions.
- Designed and developed custom Lightning Components using **Lightning Web Component** to enhance user interface and provide real-time data visualization.
