Projects

College transport management system

- Designed and implemented a college transport management software to streamline attendance tracking, route management, and data maintenance for students, faculty, and administrators. This system significantly reduced time spent on manual record-keeping, improved operational efficiency, and provided a user-friendly interface for ease of use.

Student attendance system using flutter

- Created a real-time attendance tracking app using GPS and timestamps, which streamlines processes, enhances accuracy, and offers insights into attendance for schools, workplaces, and events.

Water level detection using IoT

Developed and implemented an IoT-based water level monitoring system using ultrasonic sensors and microcontrollers for real-time data collection, analysis, and automated alerts to prevent overflow or shortages.

Certificates

Amazon Web Services (AWS) CLOUD

Mobile app development using Flutter

Microsoft Power BI

Technologies

Languages: HTML , CSS, MySQL, PHP, Java

Software and Tools: MySQL Workbench, Eclipse, Visual Studio Code, Android Studio, Power BI Desktop

Version Control System(VSS):Git, GitHub
